INVITATION TO TENDER (ITT)

PROCURING ENTITY:	National Social Security Fund Staff Pension Scheme (NSSF SPS)
CONTRACT NAME:	Supply, Installation, Configuration, Customization, Testing, Commissioning and Maintenance of an Enterprise Resource Planning (ERP) System
TENDER NO.:	NSSFSPS/ICT/ERP/001/2025-2026

1. The National Social Security Fund Staff Pension Scheme (NSSF SPS) invites sealed tenders for the Supply, Installation, Configuration, Customization, Testing, Commissioning and Maintenance of an Enterprise Resource Planning (ERP) System.
2. Tendering will be conducted under open National Competitive Tendering method using a standardized tender document. Tendering is open to all eligible, qualified and interested Tenderers.
3. Qualified and interested tenderers may obtain further information and inspect the Tender Documents during office hours (8:00 a.m. to 1:00 p.m. and 2:00 p.m. – 5:00 p.m.) from Monday to Friday, excluding public holidays, at the address given below.
4. A complete set of tender documents shall be shared to invited bidders who shall be required to register their particulars immediately by emailing pension@nssfeps.co.ke to facilitate any further clarifications or addenda.
5. All Tenders must be accompanied by a Professional Indemnity cover of KES 500,000.00 (Kenya Shillings Five Hundred Thousand only)
6. Tenders shall be quoted in Kenya Shillings and shall include all applicable taxes. Tenders shall remain valid for one hundred and fifty-four (154) days from the date of opening.
7. Completed tenders must be delivered to the address below on or before 30th June 2026 at 11:00 a.m. (East Africa Time). Electronic tenders will not be permitted. Late tenders will be rejected.
8. Tenders will be opened immediately after the deadline date and time specified above in the presence of the Tenderers' designated representatives who choose to attend at the address below.

The addresses referred to above are:

Name of Entity:	National Social Security Fund Staff Pension Scheme
Location:	NSSF Staff Pension Scheme Offices, Nairobi CBD, Mohktar Doddah Street, Hazina Trade Centre, Podium Floor, Nairobi, Kenya
Postal Address:	P.O. Box 30599 – 00100, Nairobi, Kenya
Email:	pension@nssfeps.co.ke
Tender Box Location:	NSSF Staff Pension Scheme Offices, Nairobi CBD, Mohktar Doddah Street, Hazina Trade Centre, Podium Floor, Nairobi, Kenya
Tender Opening Venue:	NSSF Staff Pension Scheme Offices, Nairobi CBD, Mohktar Doddah Street, Hazina Trade Centre, Podium Floor, Nairobi, Kenya

PART 1 – TENDERING PROCEDURES

SECTION I – INSTRUCTIONS TO TENDERERS (ITT)

A. GENERAL

1. Scope of Tender

1. The Procuring Entity, NSSF SPS, issues this tendering document for the supply and installation of an Enterprise Resource Planning (ERP) Information System as specified in Part 2. The contract name is "Supply, Installation, Configuration, Customization, Testing, Commissioning and Maintenance of an Enterprise Resource Planning (ERP) System," Tender No. NSSFSPS/ICT/ERP/001/2025-2026.

2. Definitions

1. Unless otherwise stated, definitions and interpretations in this document shall be as prescribed in Section VI – General Conditions of Contract.
2. "In writing" means communicated in written form (by mail, e-mail, or fax) with proof of receipt; "Day" means calendar day unless otherwise specified as "Business Day"; "Information System" carries the same meaning as "Information Technology."

3. Fraud and Corruption

1. The Procuring Entity requires compliance with the Public Procurement and Asset Disposal Act, 2015, Section 62 "Declaration not to engage in corruption." The tender submitted shall include declarations that the person shall not engage in any corrupt or fraudulent practice and is not debarred from participating in public procurement proceedings.
2. The Procuring Entity requires compliance with the Competition Act, 2010 regarding collusive practices. Any tenderer found to have engaged in collusive conduct shall be disqualified. Tenderers shall complete and sign the "Certificate of Independent Tender Determination" annexed to the Form of Tender.

4. Eligible Tenderers

1. A Tenderer may be a firm that is a private entity, a state-owned enterprise, or any combination in the form of a Joint Venture (JV). Public employees and their close relatives are not eligible. In a JV, all members shall be jointly and severally liable for contract execution.
2. A Tenderer shall not have a conflict of interest. Any Tenderer found to have a conflict of interest shall be disqualified.
3. A Tenderer that has been debarred from public procurement shall be ineligible. The list of debarred firms and individuals is available from the PPRA website at www.ppra.go.ke.
4. Foreign tenderers are required to source at least forty percent (40%) of their contract inputs from national suppliers and contractors.

5. Eligible Goods and Services

1. The Information System to be supplied may have its origin in any eligible country.
2. "Information System" means all required information technologies, hardware, software, supplies, consumable items, documentation, and related services necessary for proper operation, as specified herein.

B. CONTENTS OF TENDERING DOCUMENT

6. Sections of the Tendering Document

This Tendering Document comprises:

- Part 1 – Tendering Procedures: Section I (ITT), Section II (TDS), Section III (Evaluation and Qualification Criteria), Section IV (Tendering Forms)
- Part 2 – Procuring Entity's Requirements: Section V (System Requirements), Section VI (Technical Specifications), Section VII (Implementation Schedule), Section VIII (System Inventory Tables)
- Part 3 – Contract: Section IX (General Conditions of Contract), Section X (Special Conditions of Contract), Section XI (Contract Forms)

7. Clarification of Tendering Document / Pre-Tender Meeting

1. A Tenderer requiring clarification shall contact the Procuring Entity in writing at the address specified in the TDS. The Procuring Entity will respond in writing to any request received no later than seven (7) days prior to the deadline for submission of tenders.
2. A pre-tender meeting shall be held as indicated in the Tender Data Sheet. Minutes of the meeting shall be transmitted promptly to all who have obtained the Tender Documents.

8. Amendment of Tendering Document

1. At any time prior to the deadline for submission of Tenders, the Procuring Entity may amend the Tendering Document by issuing addenda. Any addendum issued shall form part of the Tendering Document.

C. PREPARATION OF TENDERS

9. Cost of Tendering

1. The Tenderer shall bear all costs associated with the preparation and submission of its Tender. The Procuring Entity shall not be responsible for those costs, regardless of the conduct or outcome of the tendering process.

10. Language of Tender

1. The Tender and all correspondence shall be written in the English language.

11. Documents Comprising the Tender

The Tender shall comprise the following:

- Form of Tender (Section IV)
- Price Schedules (Section IV)
- Professional indemnity
- Written authorization for the signatory of the Tender
- Documentary evidence of Tenderer eligibility and qualifications
- Technical proposal addressing all functional and technical requirements
- Intellectual Property list (software categories, custom materials)
- Preliminary Project Plan
- Item-by-item commentary on the Procuring Entity's Technical Requirements
- Subcontractors list (if applicable)

12. Form of Tender and Price Schedules

1. The Tenderer shall complete the Form of Tender and Price Schedules using the relevant forms in Section IV, without alterations to the text. All blank spaces shall be filled in. The Tenderer shall chronologically serialize all pages of tender documents submitted.

13. Tender Prices

1. All goods and services must be priced separately and summarized in the cost tables in Section IV. Prices quoted shall be fixed during the Tenderer's performance of the contract and not subject to increases on any account. Tenders submitted subject to price adjustment will be rejected.
2. Prices shall be quoted in Kenya Shillings inclusive of all applicable taxes, except VAT which shall be stated separately.

14. Professional Indemnity Cover

1. The Tenderer shall furnish, as part of its Tender, a Professional Indemnity of KES 500,000.00 (Kenya Shillings Five Hundred Thousand only) in original form.
2. The Professional indemnity shall be valid beyond the original validity period of the Tender. Any Tender not accompanied by a substantially responsive professional indemnity shall be rejected as non-responsive.
3. The Professional indemnity may be forfeited if the Tenderer withdraws its Tender during the period of validity, or if the successful Tenderer fails to sign the Contract or furnish the required Performance Security.

D. SUBMISSION AND OPENING OF TENDERS

15. Submission, Sealing and Marking of Tenders

1. The Tenderer shall enclose the Tender in a sealed envelope clearly marked with the tender number, name of the contract, and a warning not to open before the time and date of tender opening.
2. Completed tenders must be delivered to: Tender Box, Reception, NSSF Staff Pension Scheme Offices, Nairobi CBD, Mohktar Doddah Street, Hazina Trade Centre, Podium Floor, Nairobi, Kenya

16. Late Tenders

1. Tenders received after the deadline for submission shall not be considered. Any late tender shall be declared late, rejected, and returned unopened to the Tenderer.

17. Tender Opening

1. Tenders will be opened publicly in the presence of Tenderers' designated representatives who choose to attend, at NSSF Staff Pension Scheme offices, Nairobi CBD, Mohktar Doddah Street, Hazina Trade Centre, Podium Floor, Nairobi, Kenya at the date and time specified in the TDS.

E. EVALUATION AND COMPARISON OF TENDERS

18. Confidentiality

1. Information relating to the evaluation of Tenders and recommendation of contract award shall not be disclosed until the Notification of Intention to Award is transmitted to all Tenderers.

19. Preliminary Examination

1. The Procuring Entity will examine Tenders to determine whether they are complete, whether the required professional indemnity has been furnished, whether documents have been properly signed, and whether the Tenders are generally in order.

20. Evaluation of Tenders

1. The evaluation shall proceed in three stages: (a) Preliminary Examination for responsiveness; (b) Technical Evaluation; and (c) Financial Evaluation. Only technically qualified tenders shall proceed to financial evaluation.
2. The Procuring Entity shall award the Contract to the Tenderer whose offer has been determined to be the lowest evaluated responsive tender, provided that the Tenderer is determined to be qualified to perform the contract satisfactorily.

F. AWARD OF CONTRACT

21. Award Criteria

1. Subject to ITT 20, the Procuring Entity shall award the Contract to the Tenderer whose offer is the lowest evaluated price and substantially responsive to the requirements of the tendering document.

22. Performance Security

1. Within fourteen (14) days of the receipt of the Letter of Award, the successful Tenderer shall furnish the Procuring Entity with a Performance Security in the amount specified in the Special Conditions of Contract (not less than ten percent (10%) of the contract sum). The Performance Security shall be in the form of a bank guarantee from a reputable bank or an insurance bond.

SECTION II – TENDER DATA SHEET (TDS)

ITT Ref.	Item of Data	Data
ITT 1.1	Name and identification of the Tender	Supply, Installation, Configuration, Customization, Testing, Commissioning and Maintenance of an Enterprise Resource Planning (ERP) System Tender No. NSSFSPS/ICT/ERP/001/2025-2026

ITT 8.1	Pre-Tender Meeting	N/A
ITT 9.1	Address for clarifications	Trust Secretary/Chief Executive Officer NSSF Staff Pension Scheme Nairobi CBD, Mohktar Doddah Street, Hazina Trade Centre, Podium Floor, P.O. Box 30599-00100, Nairobi, Kenya Email: pension@nssfmps.co.ke Website: www.nssfmps.co.ke
ITT 9.1	Deadline for clarifications	No later than seven (7) days before the tender submission deadline
ITT 12.1	Currency of tender and payment	Kenya Shillings (KES)
ITT 13.1	Alternative Tenders	Not permitted
ITT 19.9	Price adjustment	Not permitted. Prices shall be fixed for the duration of the contract.
ITT 21.1	Period of validity of Tenders	154 days after the Tender submission deadline
ITT 22.1	Professional indemnity	Required – KES 500,000.00
ITT 23.1	Number of copies of the Tender	One (1) original and two (2) copies
ITT 25.1	Tender submission deadline	30th June 2026 AT 11:00 AM EAT
ITT 28.1	Tender Opening address, date and time	NSSF Staff Pension Scheme Offices, Nairobi CBD, Mohktar Doddah Street, Hazina Trade Centre, Podium Floor, Nairobi, Kenya, 30th June 2026 11:00 a.m. (EAT)
SCC	Performance Security	10% of the Contract Price (Bank Guarantee or Insurance Bond, valid through contract period + 60 days)
SCC	Payment Milestones (Phase 1)	20% upon contract signing and commencement; 30% upon completion of Phase 1 implementation and UAT sign-off; 10% upon Phase 1 post-implementation sign-off three (3) months after Phase 1 go-live.
SCC	Payment Milestones (Phase 2)	Phase 2: 15% upon commencement of Phase 2 implementation following Phase 1 Acceptance Certificate; 15% upon Phase 2 go-live and issuance of Phase 2 Acceptance Certificate; 5% upon Phase 2 post-implementation sign-off three (3) months after Phase 2 go-live; 5% retention released upon expiry of the twelve (12) month Phase 2 warranty period."
SCC	Warranty period	12 months per phase from date of acceptance.

SECTION III – EVALUATION AND QUALIFICATION CRITERIA

1. General Provision

This section specifies the criteria that the Procuring Entity will use to evaluate Tenders and qualify Tenderers. The evaluation shall be conducted in the following stages:

- Stage 1: Preliminary Examination for Responsiveness
- Stage 2: Technical Evaluation (Pass/Fail and Scored)
- Stage 3: Financial Evaluation (Lowest Evaluated Price)

2. Preliminary Examination – Mandatory Requirements

Tenders will be examined for compliance with the following mandatory requirements. Failure to meet any mandatory requirement shall result in disqualification:

No.	Criteria	Requirement	Supporting Documentation
1	Valid Certificate of Incorporation/Registration in Kenya	Mandatory	Copy of Certificate of Incorporation/Registration
2	Valid Tax Compliance Certificate from Kenya Revenue Authority	Mandatory	Copy of current TCC
3	Valid NSSF Compliance Certificate	Mandatory	Copy of current CC
4	Valid CR12 or equivalent (for companies)	Mandatory	Copy of CR12 (not older than 3 months)
5	Professional Indemnity – KES 500,000	Mandatory	Original Bank Guarantee or Insurance Bond
6	Signed Form of Tender by authorized signatory	Mandatory	Signed Form of Tender with authorization letter
7	Certificate of Independent Tender Determination	Mandatory	Completed and signed form (Section IV)
8	Self-Declaration Form (Fraud and Corruption)	Mandatory	Completed and signed form (Section IV)
9	Microsoft Dynamics 365 Business Central Authorisation: The bidder must hold a valid Microsoft Solutions Partner designation for Business Applications under the Microsoft AI Cloud Partner Program, and must provide a current Microsoft Authorisation Letter confirming their status as a certified reseller/implementer of Microsoft Dynamics 365 Business Central.	Mandatory	Copy of current Microsoft Partner certification

3. Technical Qualification Criteria

Tenderers must meet the following minimum qualification requirements:

No.	Criteria	Requirement	Supporting Documentation
1	Minimum 5 years' experience in ERP implementation	Minimum 5 years	Evidence of company registration date and reference projects
2	At least three (3) successfully completed Microsoft Dynamics 365 Business Central implementations in Kenya in the last five (5) years, of which at least two (2) must be for a pension fund, retirement benefits scheme, or RBA-regulated entity.	Minimum 3 projects	Original letters of completion or reference letters addressed to the Trust Secretary, NSSF Staff Pension Scheme, on the client's official letterhead, signed and stamped by an authorised official of the client organisation.
3	At least two (2) completed ERP post-implementation support experience for a pension scheme or retirement benefits fund in Kenya	Minimum 2 projects	Evidence of post go live support provided on implemented systems or reference letters addressed to the Trust Secretary, NSSF Staff Pension Scheme, on the client's official letterhead, signed and stamped by an authorised official of the client organisation.
4	Minimum annual turnover of KES 50,000,000 per year averaged over the last three (3) audited financial years	KES 50M/year	Audited financial statements (3 years)
5	Proposed Project Manager: minimum 5 years in ERP project management, Microsoft certification	Mandatory	CV, certifications, reference letters
6	Technical Lead: minimum 3 years in Microsoft Dynamics 365 Business Central, relevant Microsoft certifications	Mandatory	CV, certifications
7	Pension Administration Functional Consultant: minimum 3 years in pension administration module implementation	Mandatory	CV, relevant experience documents
8	Finance Functional Consultant: Microsoft Dynamics 365 Finance certified	Mandatory	CV, Microsoft certification
9	Proof of local presence in Kenya with named support contacts and office address	Mandatory	Office lease/ownership documents, list of local support staff

4. Technical Scoring Criteria

Technically responsive tenders shall be scored as follows (total 100 points; minimum pass mark: 75 points):

No.	Criteria	Maximum Points
1	Company Profile, Experience and Past Performance (no. of completed ERP implementations, size and complexity)	20
2	Technical Solution Proposal – compliance with TOR/functional requirements (completeness, fit, customization approach)	25
3	Implementation Methodology (project management approach, phased plan, risk management)	15
4	Key Personnel Qualifications and Experience	15
5	Post-Implementation Support and Maintenance Plan (SLA, local support, escalation matrix)	10
6	Data Migration and Integration Approach	10
7	Training Plan (scope, coverage, materials)	5
	TOTAL	100

SECTION IV – TENDERING FORMS

FORM 1: FORM OF TENDER

To: The Trust Secretary, National Social Security Fund Staff Pension Scheme

We, the undersigned, offer to supply, install, configure, customize, test, commission and maintain the Enterprise Resource Planning (ERP) System in conformity with the Tendering Documents for the sum of:

Total Tender Price (KES, excluding VAT):	KES _____
VAT (16%):	KES _____
GRAND TOTAL (inclusive of VAT):	KES _____

We undertake, if our Tender is accepted, to commence and complete delivery of all the items in the contract within the implementation schedule described in our Tender.

We agree to abide by this Tender for a period of 154 days from the date fixed for the Tender opening, and it shall remain binding upon us and may be accepted at any time before the expiration of that period.

We understand that you are not bound to accept the lowest or any Tender you may receive.

Signed: _____ Date: _____

Name: _____ Position: _____

On behalf of (Company): _____

Company Seal (if applicable):

FORM 2: TENDERER'S ELIGIBILITY – CONFIDENTIAL BUSINESS QUESTIONNAIRE

Full Legal Name of Tenderer:	
Country of Incorporation:	
Year of Establishment:	
Registered Office Address:	
Kenya Office Address (if different):	
Contact Person:	
Telephone:	
Email:	
KRA PIN:	
Certificate of Incorporation No.:	
Microsoft AI Cloud Partner Program — Solutions Partner designation for Business Applications:	
Does the firm have any pending litigation?	Yes / No (if Yes, provide details)

FORM 3: CERTIFICATE OF INDEPENDENT TENDER DETERMINATION

I/We, the undersigned, in submitting the accompanying Tender with reference to the above Tender Invitation, and in accordance with the Instructions to Tenderers hereby declare that:

2. The prices in this Tender have been arrived at independently, without consultation, communication or agreement for the purpose of restricting competition with any other Tenderer or competitor;
3. Unless otherwise required by law, the prices which have been quoted in this Tender have not been knowingly disclosed by us, and will not knowingly be disclosed, directly or indirectly, to any other Tenderer or competitor before award of the contract;
4. No attempt has been or will be made by us to induce any other person or firm to submit or not to submit a Tender for the purpose of restricting competition;
5. The statements contained in this certificate are true and correct and if I sign this certificate on behalf of a corporation, I have authority to so sign on behalf of the corporation.

Signed: _____ Date: _____

Name: _____ Position: _____

On behalf of: _____

FORM 4: SELF-DECLARATION FORM – FRAUD AND CORRUPTION

I/We, _____, the undersigned, hereby certify that the Tenderer (including its directors, officers, agents and employees) has not engaged, and will not engage, in any fraudulent, corrupt, coercive, collusive or obstructive practices in connection with this procurement.

I/We further certify that we are not debarred from participating in public procurement by the Public Procurement Regulatory Authority (PPRA) of Kenya.

Signed: _____ Date: _____

Name: _____ Position: _____

PART 2 – PROCURING ENTITY'S REQUIREMENTS

SECTION V – BACKGROUND AND OBJECTIVES

1. Background

The National Social Security Fund Staff Pension Scheme (NSSF SPS) was established by The National Social Security Fund (NSSF), the Sponsor, by an irrevocable trust on 1st July 2011. It is a Defined Contribution (DC) Scheme where the Sponsor contributes 16% and Members contribute 8% of the basic salary. It was created by converting the NSSF Staff Retirement Benefits Scheme, a Defined Benefit Scheme, following a government directive.

NSSF SPS's main purpose is to provide retirement benefits for its members by: collecting contributions from both members and the Sponsor; investing contributions prudently; and paying benefits to members upon retirement or exit from NSSF. The Scheme operates from NSSF Staff Pension Scheme offices, Nairobi CBD, Mohktar Doddah Street, Hazina Trade Centre, Podium Floor, Nairobi, Kenya

2. Objectives of the ERP System

The main objective of investing in an ERP system is to integrate all business processes and systems. The specific objectives include:

- Achieve quality of service, efficiency, effectiveness, and improve controls over member information, investments, prudent financial management, and general operational activities.
- Establish uniform standards and global best practice in business processes related to NSSF SPS.
- Avail information seamlessly and on demand without manual intervention and duplication.
- Facilitate management dashboards for monitoring and decision support systems.
- Facilitate business process re-engineering in various functions to make them efficient, transparent, and compliant with regulatory requirements.
- Comply with Retirement Benefits Authority (RBA) regulations and reporting requirements.

3. Expected Outcomes

- Improved service experience by all stakeholders
- Enhanced competitiveness and operational efficiency
- Reduced cost of operations
- Better and faster decision-making
- Improved ability to deploy new ICT functionalities
- Maximum return on investment

4. Specific Tasks for the Successful Bidder

The successful bidder shall supply, develop, configure, install, and customize the ERP in line with NSSF SPS requirements. The ERP solution shall be hosted in the cloud (Microsoft Azure). Specific tasks include:

- Develop an ERP project implementation plan covering both phases
- Project scoping, end-user requirement gathering, and business process re-engineering
- Implement the ERP solution incorporating all security features as described in this document
- Integrate the ERP solution with digital signatures, banks, RBA, KRA, Electronic Document Management Systems (EDMS), and existing legacy systems.
- Provide full project management services throughout
- Extract, transform, and migrate all existing data
- Undertake comprehensive user and technical training
- Pilot, test, commission, roll out, and provide post-implementation support

SECTION VI – SCOPE OF WORK

5. Implementation Phases

The contract shall be awarded for all modules in full. Implementation shall be staggered across two financial years as set out below. The successful bidder must demonstrate capacity to deliver all modules within the defined phases. The phased schedule does not alter the scope of contract award — the full system must be tendered, priced, and contracted as a single engagement.

PHASE 1 — Financial Year 2026/2027	PHASE 2 — Financial Year 2027/2028
Pension Administration Module Financial Management Modules HR & Payroll Module	Procurement Module Customer Relationship Module (CRM) E-Board Module for Trustee Meetings Electronic Document Management System (EDMS) Member Self-Service Portals (Mobile, USSD, Web) Business Intelligence and Reporting Tools Liveness Certification / Proof of Life Module

Integration between Phase 1 and Phase 2 modules must be fully architected from the outset. The bidder must demonstrate, in their proposal, how Phase 1 modules will interface with Phase 2 modules upon delivery without requiring re-implementation or significant reconfiguration. Payment milestones will be structured to reflect phased delivery.

SECTION VII – TECHNICAL REQUIREMENTS

7.1 Pension Administration Module

The solution must have the following functionalities and capabilities, fully integrated with the Financial Management module:

- Records Management: Complete member bio-data (name, payroll number, DOB, gender, marital status, National ID, KRA PIN, contact details, department, designation, banking details, workstation, exit details, profile picture); membership status tracking; document storage; linkage of member records with contributions, claims, dependents, and beneficiaries.
- Contributions Management: Import monthly contribution schedules; validate, reconcile, and post contributions; handle multiple contribution categories; support voluntary contributions and tax relief; generate detailed reports.
- Claims and Benefits: Process all exit types (normal, early, late, ill-health retirement, death, resignation, transfer, dismissal); compute benefits based on predefined formulas; apply tax computation; support partial or multiple payments.
- Pensioner Records and Payroll (IDD): Maintain retiree records; process pension payroll with tax deductions; support adjustments, audit reporting; income drawdown management; benefit projections.
- Beneficiaries/Dependents Management: Capture full beneficiary details; support children up to 21/25 years; maker-checker workflow; document verification.
- Interest Allocation: Compute and allocate interest earnings to member accounts; maintain audit trails for postings; reconcile with actuarial and investment reports.
- Online Voting: Trustee elections, scheme agenda voting, and AGM via USSD and web; anti-duplicate controls; real-time results dashboards; GPS timestamping.
- Statutory Reports: Generate RBA returns, actuarial valuation data, and financial audit data; PDF, Excel, CSV exports.
- Post-Retirement Medical Scheme Management: Track contributions and utilization; member self-service access.

7.2 Financial Management Modules

- General Ledger: Flexible chart of accounts; drill-down to source transactions; journal entries module; period control; multi-currency support; audit trail; integration with all other modules.
- Fixed Assets Management: Full asset lifecycle (PPE); integration with procurement and finance; depreciation schedules; asset register; maintenance cost tracking; insurance policies.
- Accounts Payable: Vendor management; integrated procurement-to-payment workflow; payment approval workflow via EDMS/SharePoint integration; bank file export for EFT payments; aging reports; budget-linked payments.
- Accounts Receivable: Sponsor billing; receipts allocation; sponsor statement; bank integration for auto-reconciliation; aging reports; customer portal.
- Cash and Bank Management: Online bank reconciliation with bank feed integration; real-time receipt notifications; multi-bank account management.
- Imprest/Petty Cash Management: Online application and approval workflow; integration with payroll for recovery; alerts for overdue advances; GL posting.
- Tax Management: PAYE, VAT, withholding tax, corporation tax; integration with KRA iTax; automated computation and report generation.
- Budget Management: Online budget preparation at cost center/department level; budget monitoring with real-time alerts; budget vs actual; supplementary budgets; trustee approval workflow; multi-year budgeting.
- **Investment Management: the system must provide for:**
 - a. **Portfolio Management and Asset Allocation:** Maintain complete records of all investments across RBA-approved asset classes, including equities, bonds, fixed deposits, money market instruments, real estate, collective investment schemes, and offshore investments, Enforce IPS asset allocation limits with configurable controls and automatically flag or block transactions that exceed approved limits, allow administrators to update allocation limits without vendor intervention.
 - b. **Net Asset Value (NAV) Calculation:** Calculate portfolio NAV daily or at defined intervals, Feed NAV directly into the interest allocation engine for accurate allocation of investment returns to member accounts, Maintain a complete audit trail of valuation inputs, methodologies, and outputs.

- c. **Fund Manager and Custodian Management:** Maintain records of fund managers and custodians including mandates, benchmarks, fee structures, and expiry dates, Generate alerts for mandate renewals and performance reviews, Reconcile investment records with custodian statements and fund manager reports while flagging discrepancies, Automate Assets Under Management (AUM)-based fee calculations.
- d. **Investment Committee Workflow:** Route investment decisions above configurable thresholds through maker-checker approval workflows, Generate Investment Committee papers, minutes templates, decision registers, and action trackers, Integrate with the E-Board module to support paperless committee meetings.
- e. **Performance Measurement and Benchmarking:** Calculate time-weighted and money-weighted returns by asset class and for the total fund, Measure performance against configurable benchmarks such as Treasury Bill rates, market indices, and inflation, Generate fund manager performance scorecards and benchmark comparison reports on monthly, quarterly, and annual periods, Integrate with Power BI for graphical performance dashboards.
- f. **RBA Regulatory Reporting:** Generate all investment-related RBA statutory returns and disclosure reports in prescribed formats, Alert administrators of upcoming submission deadlines, Maintain a complete audit log of regulatory submissions.
- g. **Investment Income and Interest Allocation Integration:** Automatically post dividends, interest, rental income, and capital gains to the General Ledger upon receipt or accrual, Transfer investment income data directly into the Pension Administration interest allocation process without manual intervention, Support periodic allocation of net investment returns to member accounts, Generate reconciliation reports between total investment income and member account credits.
- h. **Compliance and Audit:** Provide a real-time IPS compliance dashboard showing portfolio allocations against approved limits, Generate automated alerts for actual or potential IPS breaches to designated stakeholders, Maintain full audit trails for trades, valuations, and portfolio changes, Produce an annual IPS compliance certificate for inclusion in the Scheme's annual report.

7.3 HR & Payroll Module

- Employee Data Management: Complete bio-data capture; document management; employment status tracking; organizational structure; online recruitment portal.
- Payroll Processing: All employee categories; PAYE, SHA, NSSF, pension contributions; multiple payroll cycles; payslips; Pg forms; bank payment schedules.
- Leave Management: Online application and approval; configurable leave types; automated accrual; integration with payroll.
- Performance Management: KPI-based appraisals; multi-level approval workflow; weighted scoring; training needs identification.
- Training and Development: Training plans; provider database; attendance tracking; mandatory training alerts; professional membership management.
- Employee Self-Service: Payslips, Pg, leave balances, personal detail updates, training history.
- Separation Management: Online clearance workflow; interfaced with payroll, loans, benefits, and pension; retirement forecasting.

7.4 Procurement Module

- Procurement Planning: Annual and supplementary plans aligned with approved budget; procurement calendar with alerts; lead time calculations.
- Procurement Methods: Open tendering, restricted tendering, direct procurement, RFQ, RFP, framework agreements, low-value procurement – each with unique reference codes per PPDA Act 2015.
- Tender Management and Evaluation: Tender creation, opening, and evaluation; automated score tabulation; evaluation letters and report generation using templates.
- Contract Management: All active contracts with search, alerts, document access.
- Vendor Management: Supplier registration, rating, and communication; online pre-qualification.
- Inventory Management: Store requisitioning; automatic quantity updates; EOQ calculations; reorder alerts.
- Payments: Supplier invoice capture; multi-level approvals; mandatory document linkage (POs, contracts, invoices, delivery notes, inspection reports).

7.5 Customer Relationship Module (CRM)

- Customer Care Ticketing: Auto-generated unique ticket numbers; ticket lifecycle tracking with timestamps; escalation workflows; reopen controls.

- Notifications: Email notifications with direct ticket links; automated escalation based on timelines; HOD and CEO dashboard for oversight.
- Dashboards and Reports: Real-time dashboards (open, closed, on-hold); CEO dashboard; resolution time metrics.
- Social Media Integration: Approved social media platforms; mobile/USSD/SMS integration.
- 360° Member View: Full member interaction history; satisfaction tracking.

7.6 E-Board Module for Trustee Meetings

- Meeting Management: Automated notifications, agenda management, minutes preparation, action tracking, e-voting, digital collaboration.
- Paperless Environment: Secure role-based access; document annotation; locked packs with timestamped audit trail for edits.
- Integration: Microsoft Outlook calendar integration; one-click video conferencing; Active Directory integration.
- Access: Web, iOS, and Android; automatic SMS/email notifications for meeting changes.

7.7 Electronic Document Management System (EDMS)

- Core Capabilities: Document indexing, tagging, and classification; version control; workflow automation for approvals; role-based access control with audit trails.
- Integration: Microsoft Teams, Outlook, and OneDrive; integration with all ERP modules via API (Pension Administration, Finance, HR, Procurement, CRM, E-Board, Member Self-Service, BI).
- Implemented via Microsoft SharePoint as the EDMS platform.

7.8 Member Self-Service Portals (Mobile App, USSD, Web Portal)

- Member Access: Bio-data, contributions history and analysis, benefit statements, benefit quotation, benefit projections, trustee election voting, beneficiary and dependent updates, data change requests.
- Channels: Web portal, mobile app (iOS and Android), USSD.
- Secretariat Functions: Upload scheme documents for publishing to members or trustees (Trust Deed, nomination forms, newsletters, trustee photos).

7.9 Business Intelligence and Reporting Tools

- Custom and pre-built reports; business intelligence and analytics (weekly, monthly, quarterly, annual); integration with corporate applications; Power BI dashboards with graphical analytics and forecasting.

7.10 Liveness Certification / Proof of Life Module

- Biometric Liveness Verification: Facial recognition with anti-spoofing; fingerprint support; video gesture capture.
- OCR & ID Verification: National ID/passport OCR scanning; automated matching with pension records.
- Integration: Automatic update of pensioner "proof of life" status in ERP; payment blocking for non-compliance; workflow alerts.
- Pensioner Self-Service: Remote self-certification via portal or mobile; assisted certification at service centers using biometric devices.
- Notifications: Automated SMS, email, and in-app reminders for upcoming or overdue certifications.
- Analytics: Real-time compliance dashboards; fraud prevention reports; integration with Power BI.
- Security: End-to-end encryption; audit logs; Data Protection Act 2019 compliance.

SECTION VIII – TECHNICAL SPECIFICATIONS AND COMPLIANCE REQUIREMENTS

A. GENERAL REQUIREMENTS

No.	Requirement Description	Compliance	YES	NO	Reference Pages
	General Requirements				
1	The implementation will be done at the NSSF SPS Offices at Hazina Trade Centre, Podium Floor, Moktar Daddah Street, Nairobi, Kenya	M			
2	The ERP system shall be built on Microsoft Dynamics 365 Business Central, deployed as a fully cloud-based solution on Microsoft Azure. It shall allow authorized staff to configure and customize the system post-implementation without vendor dependency.	M			
3	All portals including mobile apps, web portals, and e-board modules must be fully integrated with the core system via APIs for seamless data exchange.	M			
4	The proposed solution must be accessible to users remotely and securely through the internet (web-based).	M			
5	The System architecture shall provide for two sandbox/dummy environments to allow configuration and testing before transporting changes to the live environment.	M			
6	The proposed solution shall be capable of importing data from XML, MS Word, PDF, Excel, CSV, Access, and other common formats.	M			
7	The proposed solution must integrate with Microsoft Active Directory and Microsoft Exchange for alerts and notifications.	M			
8	The proposed ERP shall interface with other systems using SOAP, OData, and REST (JSON) protocols. All integrations shall be via a Portal Integration interface, not hard-coded.	M			
9	The solution must integrate with: Outlook/MS Exchange, Microsoft Active Directory, Microsoft Office Applications, PDF Viewers, and Electronic Banking Interface.	M			
10	Employee Self-Service must include at minimum: Leave management, Staff advance/imprest application and surrender, and Requisition of goods/services.	M			

No.	Requirement Description	Compliance	YES	NO	Reference Pages
11	The bidder must be ready to enter into a warranty, support, and annual preventive maintenance services contract.	M			
12	The web-based application must support browser scalability (font size adjustment).	M			
13	All intellectual property in terms of ERP customization and software ownership shall be transferred to NSSF SPS upon completion of payments.	M			

B. PENSION MANAGEMENT REQUIREMENTS

No.	Requirement Description	Compliance	YES	NO	Reference Pages
	Pension Administration				
B1	General System Integration. The Pension Administration module shall seamlessly integrate with the Financial Management system, General Ledger, Accounts Receivable, Accounts Payable, Cash Management, Member Self-Service channels (web portal, USSD, and mobile app), and the Electronic Document Management System. The system shall have capability to generate a quarterly Administrator's Report for presentation to the Board of Trustees.	M			
B2	Member Registration and Bio-Data Management. The system shall register and maintain full member records with maker-checker controls and a full audit trail capturing before and after values with timestamps and user identification for every change. Member records shall capture: member and payroll number; system-generated code number; first, last, and other names; gender; date of birth; nationality; telephone number; email address; National ID and KRA PIN; date of first appointment; designation; date of joining the scheme; next of kin with scanned photograph; marital status; spouse name where applicable; beneficiary details including names, relationship, date of birth, ID number, and percentage allocation; children under 21 years; scanned photograph and fingerprints; expected retirement date; current age; membership contribution status (active, inactive, suspended, or user-defined); basic salary; last contribution; cumulative account balance; cessation date or transfer details; and cessation or transfer reason using user-defined coded reasons. The system shall validate new entries against existing data including	M			

No.	Requirement Description	Compliance	YES	NO	Reference Pages
	comparison of current and previous month salary and member lists. The search facility shall enable retrieval of member records by key demographic data with export capability. Member statements shall include a branch column importable during contribution uploads with the ability to print statements per branch in batches. The system shall accommodate different user-defined contribution categories and facilitate identification of linked member sets including members with related dependent records.				
B3	Member Portal Change Requests and Data Updates. The system shall allow members to update selected bio-data fields via the member portal, with all portal-initiated changes appearing on the responsible officer's dashboard for review before taking effect. The reviewing officer shall be able to approve, edit, or reject each change request, with a mandatory reason field required upon rejection communicated back to the member. Beneficiary details including names, relationship, date of birth, ID number, and percentage allocation shall be updatable online by the member via the portal, with a downloadable form available for signing and uploading. All changes shall maintain a full audit trail with before and after values, user identification, and timestamp.	M			
B4	Online Voting and Election Management. The system shall support online voting for scheme agenda, trustee elections, and annual general meetings with real-time graphical reports with filters, sorting, and export capability. The system shall support USSD-based voting via a short code and URL-based voting, with controls ensuring a member who has voted via USSD cannot vote again via web and vice versa. The system shall prevent voting by any member not added by the administrator to that specific voting register; restrict each member to one vote per register; and restrict members to voting only for candidates in their own category. The system shall capture a timestamp, mobile number, candidate voted for, and GPS location for each vote cast. Real-time results shall be displayed on a dashboard with bar graphs ranking candidates with drill-down to detailed results by polling station. All election reports shall be graphical with drill-down to Excel listing, including reports on members who have voted, voting station breakdowns, and summary reports of the full voting process.	M			
B5	Tax Exemption Management. The system shall support exemption of individual members from tax	M			

No.	Requirement Description	Compliance	YES	NO	Reference Pages
	computation during benefit processing, with a mandatory reason field and supporting document attachment on the member's profile. A specified cut-off date shall be set for each exemption, with automated reminders sent to the customer care dashboard to renew KRA tax exemption certificates before expiry.				
B6	Contribution Management — Data Capture and Automation. The system shall maintain sponsor contribution remittance schedules capturing sponsor code, each contributor's payroll number, and the period covered. To eliminate monthly re-entry, the system shall auto-populate current month records from the previous month including sponsor name, member names, monthly salary, department, standard contribution rates and amounts for both employee and employer, supplementary contribution amounts, total individual and organisational contributions for the period and cumulatively, contribution differences from the previous period, and total number of employees. The system shall support multiple payment modes including cheque, bank transfer, cash, M-Pesa, standing orders, and others, and shall record custodian bank details, cheque number and bank, receipt number, amount, and receipt date for each remittance received.	M			
B7	Contribution Reconciliation and Validation. The system shall support electronic reconciliation of contribution schedules comparing current month data from the sponsor against the previous month's replicated schedule in whichever format the sponsor provides the data. The system shall capture and report reasons for differences in contributions or employee numbers including new employees, salary changes, and retirees; warn when remittances received exceed or fall short of expected monthly contributions; compare EDI-received contributions against the previous month and report discrepancies; track registered and unregistered contributions separately per member and for the scheme; provide a facility to place a contribution schedule on hold prior to posting; and allocate pension contributions to individual member accounts once the contribution schedule is complete and balanced.	M			
B8	Contribution Reporting. The system shall generate contribution reports with the following breakdowns: combined employee and employer contributions per member per scheme; employee and employer contributions shown separately with year-to-date totals; employee and employer contributions shown	M			

No.	Requirement Description	Compliance	YES	NO	Reference Pages
	separately on a cumulative basis; registered and unregistered contributions per member per year and year-to-date; registered and unregistered contributions per member cumulatively; contribution trends for individual members and all members; and contribution reports downloadable in PDF and Excel formats.				
B9	Bulk Processing. The system shall support bulk import of new member details; annual posting of employee contributions across all classes and pensionable pay; processing of early leavers to deferred benefit or refund status; processing of retirements including early, late, ill health, flexible, and normal retirement; automatic bulk updating of member records from an electronic file without requiring manual re-entry for each record; pre-update validation of all bulk processes with failure messages, errors, and warnings before any records are updated; confirmation that bulk processes are discrete transactions that do not affect other transactions in progress unless a failure occurs; and batch statement processing whereby a single command processes all member statements in bulk, encrypts each with a password, and dispatches them by email in a single batch.	M			
B10	Claims, Withdrawals, and Notification Management. The system shall maintain full claim transaction records capturing membership number, member name, gender, previous or maiden names, National ID and PIN, date of birth, permanent address, date of claim, claim form number, bank name, bank branch, bank account number, date of leaving the scheme, and cause of leaving. The system shall support multiple processing of claims including partial payments and payment revisions; and process claims for all exit options including normal retirement, early retirement (active to deferred or refund), early retirement from deferred status, late retirement, death in service (fund credit and death lump sum), leaving service, and ill health retirement. The system shall display claim status at each stage (submitted, resubmission, under review, rejected, accepted, paid) with mandatory reason fields for each status; display the identity of the claims status examiner; store scanned photographs and signatures; and support Income Drawdown (IDD) functionality.	M			
B11	Death in Service and Dependent Benefits. The system shall capture and maintain the following for death in service cases: date of death, cause of death, death certificate, sponsor clearance letter, letters of administration, relationship affidavit, marriage	M			

No.	Requirement Description	Compliance	YES	NO	Reference Pages
	certificate, beneficiary names, and settlement details including cheque number, bank transfer reference, date, and amount. The system shall track dependent benefits for children up to age 18 years, crediting interest to beneficiary accounts for minors until they reach that age. The system shall compute tax in arrears for all death cases reported late and calculate death benefits in accordance with the Trust Deed and Rules.				
B12	Benefits Administration — Pensioner Records and Deductions. The system shall maintain full pensioner records capturing membership number, pensioner file number, pensioner status, spouse name, next of kin, children under 21 years, home address, telephone number, and banking details. The system shall support recovery of deductions from pension payments including taxes, SHA, insurance premiums, overpayments, court attachments, and free-description deductions. The system shall maintain survivor benefit records capturing survivor name, relationship, banking details, address, date of first payment, date of birth, and last payment date, and shall apportion benefits to beneficiaries in accordance with the Trust Deed and Rules.	M			
B13	Monthly Pension Payroll — IDD Processing. The system shall prepare monthly pension payments with bank transfers for all pensioners, electronically generating payment schedules for different banks with workflow-based approval. Deductions shall include withholding tax on monthly pension, SHA, insurance premiums, and any other deductions as requested by the pensioner. The system shall automatically post monthly pension payments, lump sums, SHA, taxes, court attachments, and any other deductions to the payment system and accounting journals without manual intervention. The system shall process unclaimed and returned cheques; reinstate pensioners to the payroll and auto-compute their dues to date; generate stoppage letters for beneficiaries whose pension is about to expire; and maintain data relating to members' annuity provider options, including one-third and two-thirds amounts paid to the annuity provider.	M			
B14	Pension Calculations and Projections. The system shall calculate annual member interest and post it to member accounts; calculate revisions to monthly pension amounts annually at a trustee-determined rate in batch or individually; provide calculation formulas for taxes and tax-free amounts per member; compute benefit projections per member and multiple members calculating both lump sum and monthly pension based on input criteria;	M			

No.	Requirement Description	Compliance	YES	NO	Reference Pages
	calculate deferred benefits incorporating interest compounding; compute actuarial projection data for IDD to support the annual actuarial review and generate annual member benefit statements downloadable and printable by members; and generate an averaging sheet with automatic computations upon input of required variables by an authorised officer.				
B15	Post-Retirement Medical Scheme : Manage post-retirement medical fund contributions and utilization, Link to member profiles for balance tracking, Provide self-service access for members to view statements	M			
B16	Pension Reporting and Analytics. The system shall generate the following reports in PDF and Excel formats: monthly pension reports; withholding tax reports in formats compatible with KRA iTax; movement reports analysing exits from the active member register by reason and year; pensioner and beneficiary listings as at a specified period including all required columns with department column; IDD pension analysis reports showing monthly joiners to the pension payroll by source scheme with filters, sorting, and export; beneficiary reports with distinct analysis of beneficiaries of deceased members and deceased pensioners; member statistics reports showing active contributing and non-contributing members and active pensioners with joiners and exits for members, pensioners, and beneficiaries; deferred pensioner reports on monthly, quarterly, annual, or custom period basis; expected retirement reports estimating lump sum and monthly pension to be paid within an expected period to support budgeting and workload planning; and withholding tax reports compatible with KRA iTax in multiple formats.	M			

C. GENERAL LEDGER REQUIREMENTS

No.	Requirement Description	Compliance	YES	NO	Reference Pages
	General Ledger				
C1	Flexible Chart of Accounts with unique alphanumeric account codes, user-defined segments, and parent-child structures.	M			
C2	Multi-currency support including conversion, revaluation, and foreign exchange gain/loss computation.	M			

No.	Requirement Description	Compliance	YES	NO	Reference Pages
C3	Full journal management: automatic posting, approval workflow, hold/release, reversal, batch upload from Excel, recurring journals.	M			
C4	Period/year-end management: closing controls, posting restrictions to prior periods, adjusting entries.	M			
C5	Accounts Payable: full payment workflow, vendor portal, bank file export, tax deduction automation, payment voucher serialization.	M			
C6	Accounts Receivable: sponsor billing, receipts allocation, customer portal, aging reports, dunning letters.	M			
C7	Imprest Management: workflow-based application, approval, accountability, payroll recovery integration.	M			
C8	Cash and Bank Management: bank reconciliation, bank feed integration, petty cash, cash forecasting.	M			
C9	Financial Reporting: IFRS-compliant statements (Income Statement, Balance Sheet, Cash Flow, SoCE, Notes); trial balance; drill-down; Power BI integration.	M			
C10	Budget Management: bottom-up and top-down; multi-year; supplementary budgets; commitment control; trustee approval workflow.	M			
C11	Petty Cash and Bank Account Setup : Capture advances and accept online petty cash requests within defined limits, Route petty cash requests through an approval workflow, Track petty cash balances automatically for replenishment, Define float limits and raise alerts when exceeded, Post petty cash transactions to the GL, Define bank accounts, including account type, name, number, branch, and swift code, Produce drilldown and custom user-defined cash management reports	M			
C12	Bank Reconciliation : Upload electronic bank statements, Match and reconcile cashbook entries against bank statements by amount and payment voucher reference, updating the bank balance online, Record bank-initiated transactions such as interest and charges as miscellaneous entries, Define matching rules, and report on reconciling items, non-reconciling items, direct debits and credits, and unreconciled items, Generate bank reconciliation reports, including reconciliation against imprest and petty cash clearance	M			

No.	Requirement Description	Compliance	YES	NO	Reference Pages
C13	Cash Forecasting :Project cash flow from transactions processed across receivables, payables, and other integrated modules, Define forecast templates covering forecasting periods and source selection criteria, Generate forecasts in any currency based on user-assigned parameters, Produce drilldown, custom, and forecast reports	M			
C14	Portfolio Management and Asset Allocation: Maintain complete records of all investments across RBA-approved asset classes, including equities, bonds, fixed deposits, money market instruments, real estate, collective investment schemes, and offshore investments, Enforce IPS asset allocation limits with configurable controls and automatically flag or block transactions that exceed approved limits, allow administrators to update allocation limits without vendor intervention.	M			
C15	Net Asset Value (NAV) Calculation: Calculate portfolio NAV daily or at defined intervals, Feed NAV directly into the interest allocation engine for accurate allocation of investment returns to member accounts, Maintain a complete audit trail of valuation inputs, methodologies, and outputs.	M			
C16	Fund Manager and Custodian Management: Maintain records of fund managers and custodians including mandates, benchmarks, fee structures, and expiry dates, generate alerts for mandate renewals and performance reviews, reconcile investment records with custodian statements and fund manager reports while flagging discrepancies, Automate Assets Under Management (AUM)-based fee calculations.	M			
C17	Investment Committee Workflow: Route investment decisions above configurable thresholds through maker-checker approval workflows, Generate Investment Committee papers, minutes templates, decision registers, and action trackers, integrate with the E-Board module to support paperless committee meetings.	M			
C18	Performance Measurement and Benchmarking: Calculate time-weighted and money-weighted returns by asset class and for the total fund, Measure performance against configurable benchmarks such as Treasury Bill rates, market indices, and inflation, generate fund manager performance scorecards and benchmark comparison reports on monthly, quarterly, and annual periods, Integrate with Power BI for graphical performance dashboards.	M			

No.	Requirement Description	Compliance	YES	NO	Reference Pages
C19	RBA Regulatory Reporting: Generate all investment-related RBA statutory returns and disclosure reports in prescribed formats, Alert administrators of upcoming submission deadlines, Maintain a complete audit log of regulatory submissions.	M			
C20	Investment Income and Interest Allocation Integration: Automatically post dividends, interest, rental income, and capital gains to the General Ledger upon receipt or accrual, Transfer investment income data directly into the Pension Administration interest allocation process without manual intervention, support periodic allocation of net investment returns to member accounts, Generate reconciliation reports between total investment income and member account credits.	M			
C21	Compliance and Audit: Provide a real-time IPS compliance dashboard showing portfolio allocations against approved limits, generate automated alerts for actual or potential IPS breaches to designated stakeholders, maintain full audit trails for trades, valuations, and portfolio changes, Produce an annual IPS compliance certificate for inclusion in the Scheme's annual report.	M			

D. PROCUREMENT MODULE

No.	Requirement Description	Compliance	YES	NO	Reference Pages
D1	Procurement Plan Management. The system shall support: creation of annual procurement plans with departmental and divisional breakdown consolidated into a master plan; maker-checker approval workflows based on initiators, processors, and approvers; breakdown view by month, week, or custom period; direct requisition creation from the procurement plan; automatic budget confirmation against departmental codes; alerts for initiation and preparation deadlines; inbuilt workflow for periodic plan updates and approvals; tracking of requisitions against plans at division, department, and organisation level; flexible approval workflows based on procurement value thresholds; ability to group requisitions by category; full audit trail and version history for all plan updates and approvals; and reporting on pending requisitions, trends versus plan, and implementation status.	M			
D2	Procurement Methods and Sourcing. The system shall support multiple procurement methods with unique reference codes including Open Tendering, Supplier Registration, Restrictive Tendering, Direct Procurement, RFQ, RFP, Framework Agreements, and Low Value Procurement; automated mapping of procurement methods to PPDA thresholds; online supplier registration and prequalification with document uploads; validation against approved plan and budget before requisitioning; alerts to HODs for items falling outside the plan with provision for supplementary requisitions; real-time display of budget balances to departments, procurement, and finance; prompts for budget reallocation	M			

No.	Requirement Description	Compliance	YES	NO	Reference Pages
	where balances are insufficient; automated notification to procurement upon budget confirmation; and escalation for requisitions pending beyond SLA timelines.				
D3	Tender Management and Evaluation. The system shall support: end-to-end management of tender creation, publishing, opening, and evaluation; generation of tender memos and minutes using configurable templates; capture of evaluation criteria (preliminary, technical, and financial) at the publishing stage; direct scoring by evaluators within the system with automated tabulation; import and export of evaluation data to and from Excel; alerts for evaluation deadlines; generation of award, regret, cancellation, and intent-to-award letters via templates; support for disposals and consultancy-specific workflows; prevention of editing or deletion of closed tenders with audit-trailed reopening; configurable PPRA-aligned approval workflows; and escalation for delayed evaluations or approvals.	M			
D4	Contract Management. The system shall support: management of active contracts with search functionality, automated alerts, and management reporting; upload and controlled access of signed contracts; linking of contracts to purchase orders, payments, and performance reports; automated alerts for contract expiries, renewals, and milestone dates; version control for all contract amendments; and configurable workflows for contract approvals and extensions.	M			
D5	Vendor and Supplier Management. The system shall support: online vendor registration and profile management; maintenance of supplier ratings and performance history; automated alerts for pending ratings and periodic evaluations; automated communication of award and regret notifications via email; quarterly supplier performance reporting; and blacklist and whitelist functionality with full audit trail.	M			
D6	Inventory and Stores Management. The system shall support: store requisitioning workflows with approvals; automatic stock updates upon issues and receipts; economic order quantity and reorder level calculations; automated alerts for stockouts, minimum and maximum thresholds, and obsolete items; periodic inventory reports (monthly, quarterly, and semi-annual); import and export to Excel; and full audit trails for all stock adjustments.	M			
D7	Payments and Invoice Management. The system shall support: capture of supplier invoices with mandatory document uploads; approval workflows involving the requisitioning HOD, Internal Audit Committee, and procurement team prior to finance action; linking of all related documents including purchase orders, contracts, invoices, delivery notes, inspection reports, and completion certificates; workflow routing for payment approvals with escalation for delayed approvals; and full audit trail of all payment approvals and rejections.	M			
D8	Reporting and Analytics. The system shall generate: procurement plan versus actual implementation reports; tender status reports (open, closed, and pending); vendor performance and contract expiry reports; inventory balance and movement reports; on-demand, periodic, and exception reports (monthly, quarterly, and semi-annual); import and export to Excel; and real-time dashboards showing percentage of plan implemented, pending requisitions, supplier ratings, and contract expiry alerts.	M			
D9	Alerts and Notifications. The system shall generate automated alerts for all procurement due dates, evaluation deadlines, contract expiries, stock levels, and pending approvals; escalate notifications to higher authority	M			

No.	Requirement Description	Compliance	YES	NO	Reference Pages
	where deadlines are missed; and support configurable email and SMS notifications by user role.				
D10	Integration and Security. The system shall integrate with: EDMS or SharePoint for all procurement documents; the Finance module for budgets, payments, and General Ledger postings; and HR or Active Directory for approval hierarchies and user authentication. The system shall enforce role-based access with segregation of duties, maintain full audit trails of all user activity including approvals, edits, and deletions, and support configurable workflows adaptable without vendor intervention.	M			

E. HR & PAYROLL MODULE

No.	Requirement Description	Compliance	YES	NO	Reference Pages
E1	Onboarding and Employee Data Management. The system shall capture and manage full employee bio-data including name, age, date of birth, employment date, designation, department, workstation, ID number, PIN, email, telephone, postal address, social media information, profile picture, banking details, and next of kin; beneficiary details including name, age, date of birth, relationship, ID, PIN, contacts, and banking details; and employee documents including ID, PIN, academic certificates, medical records, contracts, and birth and marriage certificates. The system shall track employment status changes including probation, confirmation, promotions, transfers, suspensions, and reinstatements; maintain organisational structure and reporting lines; support an online job portal for vacancies, internships, and attachments; manage job postings and reference numbers; and support online application management including document uploads, automated filtering, and shortlisting.	M			
E2	Compensation and Payroll Management. The system shall process monthly payroll for all employee categories including permanent, contract, interns, and board members; calculate salaries, allowances, deductions, and statutory remittances including PAYE, SHA, NSSF, and pension contributions (employee and employer); support multiple payroll cycles and retroactive adjustments; integrate with the General Ledger and Chart of Accounts; generate payslips, P9 forms, tax returns, and bank payment schedules; manage gratuity, bonuses, and other benefits; provide alerts for contract expiry and deduction thresholds including the one-third rule; handle petty cash, per diem, mileage reimbursement, and other staff-related costs; enforce payroll security with role-based access and audit trails; and maintain full compliance with Kenya labour laws and statutory requirements.	M			
E3	Leave and Absence Management. The system shall support end-to-end online leave application and approval workflows; configurable leave types including annual, sick, maternity, paternity, compassionate, study, unpaid, compulsory, emergency, and terminal leave; automated leave accrual based on HR policy; carry-forward of unused leave and calculation of forfeitures; integration with payroll for leave encashment; employee and manager visibility of leave balances; automated email alerts and notifications upon approval or rejection; compliance with Kenya statutory leave rules including 90-day sick leave, 90-day maternity leave, and 14-day paternity leave; and reporting on leave usage, accruals, balances, and history.	M			
E4	Performance Management. The system shall support an inbuilt appraisal workflow from self-appraisal through supervisor, HR, and trustee levels; definition of objectives and KPIs per position; 360-degree feedback and Balanced Scorecard methodologies; automatic weighted scoring totalling	M			

No.	Requirement Description	Compliance	YES	NO	Reference Pages
	100% across KPIs; KPI change control with maker-checker and timestamp; integration with the Training module for skills gap and training needs identification; performance dashboards for trustees, managers, and HR; historical performance data per employee, department, or group; reports by employee, position, department, and special group; and linkage of salary adjustments and promotions to performance results.				
E5	Training and Development. The system shall support identification of training needs from appraisals and job requirements; maintenance of a training provider database and training catalogue; creation of training plans with multi-level approvals; tracking of training attendance, completion, and associated costs; management of mandatory training with notifications and compliance tracking; historical training data management covering trainees, trainers, courses, and costs; restriction of duplicate enrolments and enforcement of cost and frequency rules; management of employee personal development plans; management of professional body memberships including renewals, reimbursements, and compliance tracking; and generation of training reports covering history, pending trainings, costs, competencies, and feedback.	M			
E6	Employee Separation. The system shall support configurable workflows for resignation, dismissal, retirement, death, and contract expiry; online clearance forms covering ICT equipment, uniforms, access cards, furniture, and other assets; capture of clearance data including name, employment number, designation, forward contacts, separation type, leave balances, and notice period; integration with payroll, loans, benefits, and pension systems; auto-generation of separation letters and final settlement reports; retirement forecasting at three years, two years, one year, and six months in advance; reinstatement workflows retaining previous employee data and updating the profile accordingly; termination of employee records without deletion; and reporting on separated employees, reasons for separation, and upcoming retirements.	M			
E7	Employee and Manager Self-Service. The system shall provide an Employee Self-Service portal enabling staff to access payslips, Pgs, and leave balances online; update personal data, banking details, and beneficiary information subject to approval; apply for leave and track application status; view training history and performance reports; and upload dependent and next of kin information. The system shall provide a Manager Self-Service portal enabling managers to approve or reject leave requests with comments; view team employment history and leave schedules; view team training data and performance dashboards; and update departmental calendars synchronised with the organisational calendar.	M			
E8	Reporting and Analytics. The system shall provide real-time dashboards for payroll, leave, training, and performance; generate HR analytics covering headcount, turnover, absenteeism, salary costs, and training history; support export of reports to PDF, Excel, and Word; provide drill-down capability for board and trustee reporting; support report sorting, filtering, and grouping functionality; and track allocated staff assets including ICT equipment, furniture, and uniforms.	M			
E9	Compliance and Security. The system shall enforce role-based access control for HR, payroll, and employee data; maintain compliance with Kenya labour laws and the Data Protection Act 2019; maintain a full audit trail of all approvals, payroll edits, and HR record changes; and support integration readiness with the Finance, Loans, and Pension Administration modules.	M			

F. CUSTOMER CARE / CRM MODULE – REQUIREMENTS

No.	Requirement Description	Compliance	YES	NO	Reference Pages
F1	Contact and Stakeholder Management. The system shall maintain a centralised database of all members, service providers, stakeholders, and clients, accessible across all CRM functions.	M			
F2	Customer Care Ticketing. The system shall log all member inquiries as tickets with predefined and common query categories available for auto-selection; auto-generate unique, non-erasable ticket numbers for every inquiry; track the full ticket lifecycle with timestamps for creation, allocation, resolution, and closure; allow reopening of closed tickets solely to add new status details while preserving the full ticket history intact; allow customer care officers to close tickets on behalf of colleagues with mandatory narrative entries and document attachments; and provide quick search functionality to access a member's complete ticket history including past queries, nature of issues, and resolutions.	M			
F3	Notifications and Escalation Workflow. The system shall send automated email notifications with direct ticket links upon ticket allocation or reassignment; escalate unresolved tickets based on predefined timelines and rules; and allow HODs and the CEO to view, comment on, or reassign tickets at any stage.	M			
F4	Dashboards and Reporting. The system shall provide real-time dashboards for open, closed, and on-hold tickets with sorting, filtering, and export to Excel, PDF, and Word; a dedicated CEO dashboard displaying open tickets, member details, nature of issues, and responsible officers; and reports on escalations, resolution times, and common query patterns.	M			
F5	Analytics and Customer Insights. The system shall provide a 360-degree view of members and stakeholders; track escalation patterns, ticket trends, and resolution metrics; and support measurement of customer satisfaction and prediction of service trends.	M			
F6	Performance Management. The system shall support definition and monitoring of CRM-related KPIs and display performance metrics through role-based dashboards.	M			
F7	Social Media Integration. The system shall integrate with approved social media platforms to enable receipt of member feedback and outbound communications.	M			
F8	Mobile, USSD, and SMS Integration. The system shall integrate with the NSSF SPS Mobile App, USSD platform, and SMS gateway to enable ticket logging and query handling across all member-facing channels.	M			
F9	Email Marketing and Campaigns. The system shall support creation of member newsletters, scheme updates, and promotional communications; audience segmentation; and tracking of campaign performance and engagement metrics.	M			
F10	Compliance and Security. The system shall enforce role-based access control for all CRM and customer care data; maintain a full audit trail for all ticket handling, updates, and escalations; and ensure compliance with the Data Protection Act 2019 and applicable privacy regulations.	M			
F11	Omnichannel Expansion. The system shall support WhatsApp Business inbound and outbound messaging; email-to-ticket conversion via IMAP or Microsoft Graph API from any mailbox to a ticket queue; an embeddable web chat widget deployable on any website; Telegram and Facebook Messenger inbound channels via webhook adapters; Live Agent Assist functionality enabling AI-suggested responses for officer review and approval before sending; and a unified inbox view across all channels that is ticket-centric and channel-agnostic.	M			

G. EDMS VIA SHAREPOINT – REQUIREMENTS

No.	Requirement Description	Compliance	YES	NO	Reference Pages
G1	Document Capture. The system shall support a wide variety of scanners and hybrid capture devices; import of photos from digital cameras and mobile phones with image straightening and OCR processing; processing of images from computers and network folders including image enhancement, OCR, and metadata extraction; auto-naming of documents by user, date, or field values; scanning of additional pages into existing documents; image adjustments including noise removal, cropping, rotation, line removal, and image cleanup; automatic removal of blank pages; archiving of native electronic documents including text files, spreadsheets, PDFs, audio and video files, and AutoCAD files; drag-and-drop import from Windows Explorer; direct saving of Word, Excel, PowerPoint, and Outlook documents to SharePoint; capture profiles for data extraction and workflow triggering; export and import of documents, folders, annotations, and metadata; conversion of electronic documents to archival images without printing; full text extraction from documents; folder creation from the import dialogue; querying of external databases to minimize manual data entry; automatic use of extracted data for document naming, indexing, and workflow input; document identification via forms or extracted data with support for separation or individualized processing; scheduled document upload and automated scanning session initiation; annotation tools including highlighting, stamping, and sticky notes with secured scanning sessions; automatic redaction of sensitive data patterns; and a mobile capture application with offline storage and automatic upload upon connectivity restoration.	M			
G2	Indexing and Metadata. The system shall support field values and multi-tier dynamic fields; Bates numbering; multiple indexing templates per document type; auto-population of template information from parent folders; color-coding of document types; reassignment and updating of templates and fields; tags for categorization (informational and security); required fields, multi-value fields, and comment fields with automatic username and timestamp recording; and reduction of manual data entry through auto-naming, indexing, and metadata assignment.	M			
G3	Search, Query, and Retrieval. The system shall support basic and advanced search functionality; instant retrieval with Boolean operators; simultaneous search by metadata and document content; permission-based search results with contextual hit display; and search initiation from external applications.	M			
G4	User Interface. The system shall provide an intuitive, user-friendly interface with tooltips; interface customization without coding; configurable settings without writing code; ability to delete or modify fields and create documents directly; and authorized external system access to SharePoint content.	M			
G5	Document Distribution. The system shall support accurate print scaling; cross-platform document retrieval via web browsers; drag-and-drop sharing via shortcuts and URLs; export of documents in native formats; and compression and encryption of files for secure email distribution.	M			
G6	Document Management and Version Control. The system shall support preview of documents and metadata without opening; document renaming, reorganization, version tracking, version comparison, and reversion; check-in and check-out functionality; document linking including email attachments; public and private folders with searchable sticky notes and hyperlinks; stamps and annotations that do not alter	M			

No.	Requirement Description	Compliance	YES	NO	Reference Pages
	original documents; display in black and white, color, and greyscale; OCR-editable text files; full panning, rotation, and contrast adjustment; workflow initiation from the client with visibility of current workflow steps; page reordering via drag-and-drop; customizable toolbars and browser fonts; and work queue support for pending approvals.				
G7	Records Management. The system shall be DoD 5015.2 certified and VERS certified for records preservation and integrity; support management of both physical and digital records; enable definition of record series, location tracking, and retention schedule triggering; support automatic classification and auto-filing of incoming records; enforce event-based and time-based cut-off with retention periods defined in years or months; support non-recoverable destruction with metadata retention; provide freeze and hold functionality with review dates for vital records; and generate notifications for records approaching disposition dates.	M			
G8	Business Process Management and Workflow. The system shall support process modelling via an intuitive drag-and-drop interface; automated document movement with rules-based routing; nested workflows, built-in activities, workflow tracking, exception handling, and try-catch support; database push and pull activities without coding; event-triggered and schedule-triggered workflows; dynamic security on documents and folders; and email and SMS notifications within workflows.	M			
G9	System Integration. The system shall integrate with the ERP, core banking systems, mobile applications, USSD, SMS, email, and other enterprise applications; support document access via unique URLs; and support multi-function devices including scanners and copiers.	M			
G10	Administration and Security. The system shall support definition of user roles and session access control; a web-based administration console with MMC snap-in; event tracing, logging, and error reporting; password policies and idle-time logout; updates and hotfix management; privilege rights, feature rights, and access rights management; and centralised or delegated security management.	M			
G11	Analysis and Reporting. The system shall provide out-of-the-box reporting without additional BI tools; real-time dashboards; audit and exception reporting; security overview reports; and export of reports in CSV and other formats.	M			

H. E-BOARD MODULE FOR TRUSTEE MEETINGS

No.	Requirement Description	Compliance	YES	NO	Reference Pages
H1	Meeting Notifications. The system shall notify selected board members of scheduled meetings in advance, supporting different meeting types including defined committee, joint, and selected-person meetings. Notifications shall include the organization name, date, time, and location; nature of the meeting (special, committee, SFI, or other); a preliminary agenda supporting multiple agenda items; and a system-generated timestamp recording the date and time of notice creation.	M			
H2	Meeting Types and Stages. The system shall manage multiple meeting types from a single location; support creation of adjourned meeting notices while maintaining a full audit trail; and track meetings across all stages including pre-meeting (automatic agenda generation), during the meeting (automated minutes creation), and post-meeting (automated action-taken report capturing who is responsible, by when, and for what).	M			

No.	Requirement Description	Compliance	YES	NO	Reference Pages
H3	Integration and Calendar. The system shall integrate with Microsoft Outlook calendar and provide a calendar feature enabling board and committee members to view all approved meeting notices and scheduled meetings.	M			
H4	Search and Repository. The system shall support advanced search by meeting type, date, and other parameters, and maintain a central repository of all meeting notices and board documents available for future reference and audit purposes.	M			
H5	Notes, Comments, and Collaboration. The system shall enable participants to create private personal notes on agenda items; allow public comments visible to authorized participants; and support annotation, marking, sharing, synchronization, and document collaboration within the platform.	M			
H6	Roles, Permissions, and Access. The system shall enforce role-based access for meeting preparation and approval; require Trust Secretary approval before meetings appear on attendee dashboards; support inclusion of external participants such as lawyers and fund managers with restricted rights excluding voting and public comments; provide anytime, anywhere access via web, iOS, and Android; and send automatic SMS notifications to participants upon meeting changes.	M			
H7	Voting and Approvals. The system shall provide an eVoting function enabling members with voting rights to vote on specific agenda items or full meeting minutes; and prevent editing of locked meeting packs, requiring both requester and approver authorization with a timestamped audit trail for any amendments.	M			
H8	Digital Meeting Management. The system shall support fully digital and automated meeting workflows; integrated one-click video conferencing; and an administration panel for configuring meeting types and managing participant lists.	M			
H9	Security and User Management. The system shall integrate with Active Directory for user creation and password management; enforce role-based access control for all board members and participants; and support flexible configuration of new meeting types with different rules as required.	M			
H10	Governance and Legal Compliance. The system shall comply with the Mwongozo Code of Governance for State Corporations, addressing board effectiveness, transparency and disclosure, accountability, risk management, internal controls, ethical leadership, and good corporate citizenship. The system shall support automated audio capture and transcription of meetings to text for accurate and timely generation of board minutes. The system shall be multilingual, offered in both English and Kiswahili, with read-aloud functionality and WCAG accessibility compliance to cater for persons with disabilities.	M			
H11	System Requirements. The system shall provide full mobile application support for iOS and Android devices, enabling board members to participate in and manage meetings from any location and device.	M			

I. BUSINESS INTELLIGENCE AND REPORTING TOOLS.

No.	Requirement Description	Compliance	YES	NO	Reference Pages
I1	Custom Reports. The system shall allow users to design and generate custom reports across all ERP modules; and support both ad-hoc reporting for on-demand queries and scheduled report generation at defined intervals.	M			

No.	Requirement Description	Compliance	YES	NO	Reference Pages
I2	Business Intelligence and Analytics. The system shall provide weekly, monthly, quarterly, and annual reporting; and include trend analysis, comparative performance metrics, and drill-down capabilities enabling users to move from summary to transaction-level detail.	M			
I3	Integration with Data Sources. The system shall integrate with all corporate applications that generate data and ensure consolidated reporting across ERP modules and external systems without manual data re-entry.	M			
I4	Dashboards, Forecasting, and Visualization. The system shall provide dashboards with top-level graphical analytics; support interactive visualizations with configurable filters and export to Excel, PDF, and Word; and include forecasting and predictive analytics capabilities to support management and trustee decision-making.	M			

J. LIVENESS CERTIFICATION MODULE.

No.	Requirement Description	Compliance	YES	NO	Reference Pages
J1	Biometric Verification. The system shall support facial recognition with liveness detection, fingerprint scanning, and iris recognition; and shall comply with ISO/IEC 19794 and NIST Biometric Standards for all biometric capture and processing.	M			
J2	Real-Time Liveness Detection. The system shall detect live presence through blinking, movement, or 3D imaging analysis; and shall prevent spoofing attempts using static photos, video replays, or other presentation attacks.	M			
J3	Remote Access. The system shall enable pensioners to complete proof of life verification via a mobile application or web browser from any location; and shall comply with WCAG 2.1 accessibility standards to ensure usability for elderly and disabled users.	M			
J4	Integration with Core Pensioner Database. The system shall automatically update pensioner records and eligibility status upon successful liveness verification; and shall achieve this integration via secure APIs connected to the Pension Administration module.	M			
J5	Scheduled and Ad-Hoc Checks. The system shall support configurable certification schedules including quarterly, annual, and on-demand verification; and shall accommodate regulatory and policy-driven certification requirements as defined by the Scheme.	M			
J6	Audit Logs and Reporting. The system shall record all proof-of-life events with time-stamps and geo-tagging; and shall maintain traceable logs including user identification details to support fraud investigation and regulatory audit.	M			
J7	Notifications. The system shall send automated SMS, email, and push notification reminders to pensioners with pending proof-of-life submissions, with configurable reminder frequency and escalation.	M			
J8	Multi-Language and Accessibility. The system shall be accessible to elderly and disabled users; and shall comply with local language requirements and Kenya accessibility standards, including support for both English and Kiswahili.	M			
J9	Secure Data Protection. The system shall encrypt all biometric data both at rest and in transit; and shall comply with the Kenya Data Protection Act	M			

No.	Requirement Description	Compliance	YES	NO	Reference Pages
	2019 for all collection, storage, processing, and retention of biometric and personal data.				
J10	Integration with National Identity Databases. Where legally permissible, the system shall support cross-verification of pensioner identity against authoritative national databases including the Integrated Population Registration System (IPRS).	O			
J11	Administrative Override and Manual Verification. The system shall provide a supervised workflow for exceptional cases where biometric verification cannot be completed, including pensioners with no biometric data or those in areas with poor connectivity, ensuring no eligible pensioner is excluded from certification.	M			

K. MEMBER SELF-SERVICE PORTALS

PART 1: MEMBER WEB PORTAL

No.	Requirement Description	Compliance	YES	NO	Reference Pages
K1	Access, Licensing, Authentication and Security. The portal shall support a minimum of 3,000 members accessing simultaneously with no license restrictions on member logins; authenticate member details against live ERP data; support password reset via OTP to a registered mobile number with an option to disable OTP for individual accounts; allow administrators to enable or disable member portal access; enforce multiple user roles with fine-grained access control; support responsive display across all mobile devices and screen sizes; and generate utilization reports showing login frequency, active users, and the ability to block accounts or blacklist IP addresses.	M			
K2	Member Profile and Information View. The portal shall enable members to view their personal information including full name, National ID or Passport number, gender, date of birth, phone number, and marital status; contact information including email address, mobile number, work telephone, postal code, and postal address; beneficiary details including name, National ID number, mobile telephone, relationship, physical address, and percentage allocation; employment details including scheme name, sponsor name, date of joining, PIN number, bank code, bank account number, address, town, and date of first appointment; and the ability to update their passport photo subject to maker-checker approval.	M			
K3	Contributions and Financial Data. The portal shall enable members to view their annual remittance statements showing Employee Portion (EE), Employer Portion (ER), AVCs, and Transfer-In amounts on an annual basis; monthly remittance details showing the Employee Portion (EE), Employer Portion (ER), and AVCs; and filter contribution history by day, month, and year.	M			
K4	Statements, Benefits and Projections. The portal shall generate member benefit statements online showing interest, opening balances, closing balances, and other fields in the Scheme's prescribed format, with administrator ability to place statements on hold for individual or all members; export benefit statements in password-protected PDF format delivered to the member's email and mobile number; send bulk statements to all member emails using a personalized and editable email template, with the ability to categorize and bulk print statements by department and bulk dispatch by email; support batch printing of all member statements	M			

No.	Requirement Description	Compliance	YES	NO	Reference Pages
	without opening individual accounts, with filters by branch, member status, and date; enable members to project their benefits with administrator override to temporarily suspend this function; handle tax exemptions by excluding tax computation for exempt members during benefit processing; and support voluntary contributions per member with automatic tax relief computation.				
K5	Self-Service Transactions and Change Requests. The portal shall enable members to initiate change requests for contact detail updates; addition of new beneficiaries subject to maker-checker approval; removal of beneficiaries subject to maker-checker approval; and changes to beneficiary percentage allocation subject to maker-checker approval.	M			
K6	Communications, Surveys, Notifications and Reporting. The portal shall integrate with a bulk messaging gateway for alerts and notifications; enable members to respond to surveys generated by the ERP with analytic reports for each survey available on the customer care and pension administrator dashboards; allow members to give feedback and comments; support bulk SMS communications to members; enable members to view and download scheme documents; and provide data visualisation via charts and graphs across all modules with drill-down, export, filtering, sorting, and dynamic dashboard display based on user access rights.	M			

PART 2: MOBILE APPLICATION

No.	Requirement Description	Compliance	YES	NO	Reference Pages
K7	Registration, Authentication and Security. The mobile application shall support member self-registration subject to IT administrator approval; member sign-up using National ID, cheque number, or pension number; PIN and password reset via a registered mobile number subject to maker-checker approval; the ability for members to change their security PIN or password; logging of all member activity and the ability for administrators to block individual accounts with a custom message displayed to the member on login attempt; and support for iOS and Android platforms.	M			
K8	Member Information Display. The mobile application shall display member personal information including names, member number, date of birth, gender, and marital status; beneficiary details including name, National ID, relationship, percentage allocation, and contact details (postal address, email, and telephone); and employment details including sponsor name, sponsor number, date of joining, PIN number, bank code, bank account number, mobile number, email, postal code, and postal address; together with capture and display of the member's profile photo.	M			
K9	Contributions and Financial Data. The mobile application shall display a member's summarized annual contributions grouped by year; support search and filter of contribution history by day, month, and year with export to Excel; display monthly contribution details; and support payroll and voluntary contributions per member.	M			
K10	Statements, Benefits and Projections. The mobile application shall generate member benefit statements exportable in PDF and Excel formats in the Scheme's prescribed format with logo; project member benefits with export to Excel; calculate the Income Replacement Ratio (IRR); and generate benefit quotes on demand.	M			

No.	Requirement Description	Compliance	YES	NO	Reference Pages
K11	Self-Service Transactions and Complaints. The mobile application shall enable members to initiate data change requests subject to a two-stage internal approval process; and raise complaints via the mobile app or web with the ability to track the complaint status through to closure.	M			
K12	Content, Communications and Technical Requirements. The mobile application shall support dynamic audio-visual content; enable members to download scheme-relevant documents in PDF format; support organisation-initiated push notifications for announcements, new products, and branding information on both iOS and Android; support integration with social media platforms; and provide full multi-platform support for Android and iOS.	M			

PART 3: USSD APPLICATION

No.	Requirement Description	Compliance	YES	NO	Reference Pages
K13	USSD Self-Service Channel. The system shall provide a USSD self-service channel accessible to members on all major Kenyan mobile networks (Safaricom, Airtel, and Telkom) without requiring internet connectivity or a smartphone. The USSD channel shall support member authentication via a secure USSD PIN; account balance inquiry displaying the member's current pension account balance; contribution inquiry showing the last contribution received and the date of receipt; mini-statement showing the last three to six contribution transactions including Employee Portion (EE), Employer Portion (ER), and Additional Voluntary Contributions (AVC); AVC inquiry enabling members to view their total accumulated voluntary contributions and the applicable tax relief computed to date; benefit projection displaying an estimated projected benefit based on current account balance and assumed growth rate; claim status inquiry enabling members to track the progress of a submitted benefit claim through the processing pipeline; liveness certification trigger enabling pensioners to initiate or complete a proof-of-life verification via USSD where mobile app or web access is unavailable; complaint and query logging enabling members to log a support ticket via USSD with an auto-generated ticket reference number returned to the member by SMS; and PIN change functionality enabling members to update their USSD PIN securely. The USSD menu shall be available in both English and Kiswahili, shall comply with WCAG accessibility principles to the extent applicable to USSD, and shall time out inactive sessions within a configurable period. All USSD sessions shall be logged with timestamps, member identifiers, and session outcomes for audit purposes.	M			

L. SYSTEM REQUIREMENTS

No.	Requirement Description	Compliance	YES	NO	Reference Pages
L1	System Administration. The system shall provide comprehensive, non-editable audit trails secured from unauthorized access; maintain old and new values for every data change together with the transaction that generated the record; have clearly defined and well-documented system parameters including application controls, authorizations, and standard security configurations that allow efficient and controlled processing while protecting sensitive data; support multiple levels of security including field-level protection and function-level access restrictions pending policy maker	M			

No.	Requirement Description	Compliance	YES	NO	Reference Pages
	approval; provide templates or group functions for maintenance management with automatic security privilege reviews triggered by changes in assignment or termination; maintain comprehensive transaction and security incident logs for audit purposes; and allow administrators to export logs in multiple formats over defined periods for offline analysis.				
L2	System Access and Security. The system shall integrate with Microsoft Active Directory for robust security administration and authorization profiles; enforce authority checks to ensure only authorized individuals can access the system or perform specific operations; maintain a non-editable audit trail of all changes to authorization profiles with filter, search, and sort functionality; support archival of ERP documents to a separate secured and searchable repository; prevent simultaneous updates to the same record by multiple users; enforce a configurable number of failed login attempts before locking access; generate immediate email and SMS alerts to a defined distribution list upon security events or incidents via Microsoft Exchange integration; automatically log out idle users after a configurable period; maintain user-defined and system-defined security profiles at multiple levels; support Single Sign-On (SSO); provide controlled module and menu access managed by the system administrator; support individual and group job schedule requests; support user-defined menus with attached business functions; provide default and user-defined data groups for business data access control; include an inbuilt System Administrator role with full request monitoring capability; support user-defined responsibilities and profiles with attached functions and reports; define tiered security policies by user level including high security and medium security profiles; implement a security matrix of roles against authority with segregation of privileges; support data masking and encryption of sensitive data; enforce digital and electronic signatures for all maker-checker workflows; and support seamless transition between DB and DC scheme views without requiring the user to log off, displaying the active scheme name at all times.	M			
L3	User Interface. The system shall provide an intuitive, user-friendly interface that minimizes training requirements; maintain a consistent look and feel across all modules; provide online help for all modules; identify and flag errors, inconsistencies, or missing data at the point of entry and suspend or reroute processing for real-time resolution; support user-configurable quick menus or favorites for frequently used functions; and operate in English across all modules and components.	M			
L4	Date, Time Stamping and Audit Trails. The system shall automatically generate records and logs for all data creation, modification, and deletion events; timestamp all records and logs with the user ID, machine name, MAC address, and IP address of the individual performing the action; and maintain a full before-and-after audit trail for every change across the entire ERP, capturing the table affected, the row changed, the user responsible, the timestamp, and the values before and after the change — including all changes to member and pensioner records.	M			
L5	System Flexibility. The system shall produce accurate, complete, and readable records; support open system interfaces with complementary software partners; be available on mobile and operating-system independent; support Graphical User Interface (GUI) input and output design; be built on web-based architecture; support unlimited concurrent workstation access with high-speed multiuser response times; be scalable with optimized source code that prevents freezing, slowdown, or hanging under load; support interfaces feeding from legacy systems and web-based systems; be vendor-agnostic and compatible with standard hardware, operating systems, database management software, networking hardware, and internet	M			

No.	Requirement Description	Compliance	YES	NO	Reference Pages
	infrastructure; be a fully integrated and operationally proven system with clear, user-friendly error handling; and be easily reconfigurable to accommodate changes in business practices, policy directives, organizational structure, legislation, and regulations.				
L6	Output Controls. The system shall ensure that all processed data is delivered to users in a consistent, accurate, and secure manner across all output channels.	M			
L7	Multiple Environments. The system shall support independent copies of the environment for production, training, development, and testing; and ensure that each environment is sufficiently isolated so that operations in one environment do not affect any other.	M			
L8	System Performance. The system shall maintain responsiveness and availability at all times, ensuring that volume or batch processing does not interfere with online responsiveness or system availability for concurrent users.	M			
L9	Disaster Recovery. The bidder shall propose multiple disaster recovery configurations indicating the level of protection offered by each; and the system shall support replication, rapid failover, and redeployment in the event of failure or planned maintenance, with snapshot and restore point functionality enabling reversion to a defined system state.	M			
L10	Reporting. The system shall include comprehensive graphical reporting tools across all modules supporting ad-hoc reporting with drill-down, filtering, and sorting; provide standard reports as models for customized reporting and basic functional requirements; include report wizards or equivalent tools to guide non-technical users through report creation; be designed so that reporting activity does not compromise interactive system responsiveness; enable departments to develop ad-hoc reports independently using a data dictionary or equivalent tool accessible to non-technical users; and support report output in multiple industry-standard formats including PDF, XML, XLS, XLSX, CSV, and TXT.	M			

M. PROJECT MANAGEMENT REQUIREMENTS

No.	Requirement Description	Compliance	YES	NO	Reference Pages
	Project Management				
M1	Implementation Methodology and Strategy. The bidder shall provide a detailed description of the proposed recognized methodology for implementing the ERP system, covering functional analysis, installation, configuration, testing, staging, data migration, deployment, risk management, and training services. The bidder shall develop a comprehensive implementation strategy and project plan including task estimation, project planning, work allocation, progress tracking and monitoring, and reporting scenarios. The bidder shall develop an issues resolution methodology; a risk identification and mitigation strategy with a documented contingency plan; and technical standards for modifications, security, data conversion, and system administration across all modules. The bidder shall	M			

No.	Requirement Description	Compliance	YES	NO	Reference Pages
	also describe the tools and techniques to be used in managing the project.				
M2	The vendor shall appoint a dedicated Project Manager with at least 5 years of ERP project management experience and a valid Microsoft certification.	M			
M3	Project Team, Resources and Knowledge Transfer. The bidder shall describe the project management team structure, including the technical qualifications, roles, and responsibilities of all team members. The bidder shall describe all business and IT resources required for the project to succeed, including clear resource roles and responsibilities throughout the implementation and a plan for knowledge transfer to NSSF SPS staff. The bidder shall describe the process for transferring knowledge and training NSSF SPS administrators upon completion of each implementation phase.	M			
M4	The vendor shall provide a detailed Project Implementation Plan (using MS Project or equivalent) within 14 days of contract signing.	M			
M5	The vendor shall conduct monthly progress reporting to the NSSF SPS ERP Core Team and Management.	M			
M6	The vendor shall establish a steering committee meeting schedule with NSSF SPS management.	M			
M7	The vendor shall manage all change requests formally via a Change Request Register with documented approvals.	M			
M8	The implementation schedule shall cover no more than 24 months across two financial years (2026/2027 and 2027/2028).	M			
M9	Project Tracking, Reporting and Escalation. The bidder shall describe the approach to task management and tracking, project meetings, and project documentation; the method for providing timely status updates to NSSF SPS senior management; the procedures to be used to keep the project on track; and the escalation procedures to be invoked to address delays, risks, or problems with project progress.	M			
M10	Deliverables, Vendor Verification and Development Standards. The bidder shall provide a comprehensive list of all project deliverables with detailed specifications for each.	M			

N. DATA MIGRATION REQUIREMENTS

No.	Requirement Description	Compliance	YES	NO	Reference Pages
	Data Migration				
N1	The vendor shall conduct a data audit of all existing data sources prior to migration.	M			
N2	The vendor shall provide a Data Migration Strategy document for approval by the NSSF SPS ERP Core Team.	M			
N3	Data migration shall include a minimum of three (3) dry runs with reconciliation reports before go-live.	M			
N4	All historical data shall be migrated and verified prior to go-live, covering member records, contribution history, financial data, and HR records.	M			
N5	The vendor shall provide a post-migration reconciliation report signed off by NSSF SPS.	M			

O. DATABASE ANALYSIS REQUIREMENTS.

No.	Requirement Description	Compliance	YES	NO	Reference Pages
O1	Database Architecture and Performance. The bidder shall document the proposed database architecture including database engine, version, indexing strategy, partitioning approach, and query optimization methodology. The database shall be sized to accommodate current data volumes plus a minimum of ten years of projected growth without performance degradation. The bidder shall specify database backup frequency, backup retention periods, and recovery procedures aligned with the RPO and RTO defined in the disaster recovery requirements.	M			
O2	Database Security. The database shall enforce access controls at the schema and table level, ensuring that application users can only access data required for their role. Direct database access outside the application layer shall be restricted to authorized database administrators only, with all direct access logged and audited. Sensitive data fields including member financial data, biometric data, and banking details shall be encrypted at the database level.	M			

P. BUSINESS VALUE ENHANCEMENTS REQUIREMENTS

No.	Requirement Description	Compliance	YES	NO	Reference Pages
P1	Business Requirements Identification. The vendor shall work collaboratively with all relevant NSSF SPS user departments and divisions to identify, document, and validate all business requirements prior to	M			

No.	Requirement Description	Compliance	YES	NO	Reference Pages
	system configuration, ensuring that the implemented solution reflects the actual operational needs of the Scheme.				
P2	Business Process Best Practices. The vendor shall implement best-practice business processes associated with the supplied system across all modules; produce best-practice business process documentation for all implemented processes in a format accessible to non-technical staff; and describe in their Technical Proposal how they will assist NSSF SPS in maximizing business value from the system throughout the implementation and post go-live periods.	M			
P3	Business Process Improvement Methodology. The vendor shall provide a detailed methodology for undertaking business process improvement activities and shall execute those activities as part of the implementation. The methodology shall include: a gap analysis comparing the vendor's proposed best-practice processes against NSSF SPS's current business processes; development of a documented "To Be" business model based on the proposed system solution and industry best practices; and creation of Key Performance Indicators (KPIs) to measure the efficiency and effectiveness of the new processes post go-live.	M			
P4	Vendor Experience in Business Value Services. The vendor shall provide evidence of firm experience in delivering business value enhancement services including gap analysis, business process reengineering, "To Be" modelling, and KPI development, with reference to specific engagements where these services were delivered alongside ERP implementations.	M			

Q. INTEGRATION REQUIREMENTS

No.	Requirement Description	Compliance	YES	NO	Reference Pages
Q1	Integration Review and Implementation. The vendor shall conduct a formal integration review workshop with NSSF SPS stakeholders, the outcome of which shall be a complete mapping of all existing points of system integration, identification of all new integration points required, and identification of existing integration points that would benefit from redesign or reimplementation. The vendor shall implement all integration requirements identified as a result of the workshop, with a documented integration register maintained throughout the project.	M			
Q2	Interface Development, Management and Documentation. The vendor shall describe their interface development process in their Technical Proposal; implement an interface management methodology and process enabling NSSF SPS to maintain all interfaces independently after go-live; implement operational processes for the ongoing monitoring and management of all system integration points; and supply all documentation, manuals, and guides necessary for maintaining the integration platform, including technical specifications for each interface.	M			
Q3	Integration Training and Knowledge Transfer. The vendor shall conduct a dedicated integration training workshop for the NSSF SPS ERP Core Team with the objective of building internal capacity for in-house maintenance and support of all interfaces, and for the future development of additional interfaces without vendor dependence.	M			
Q4	Integration Platform and Architecture. The system shall support modern best-practice data management with all data located in one integrated, centralized system shared across all NSSF SPS departments, eliminating multiple handling of data and improving accuracy across enterprise-wide business processes. The vendor shall provide an open, vendor-agnostic	M			

No.	Requirement Description	Compliance	YES	NO	Reference Pages
	integration platform capable of integrating the ERP with current information systems and future systems yet to be identified, without restricting integration to specific vendors or proprietary products.				

R. DOCUMENTATION STANDARDS

No.	Requirement Description	Compliance	YES	NO	Reference Pages
R1	Documentation Governance. All project documentation in both softcopy and hardcopy shall be handed over by the vendor and shall be considered final upon approval by the NSSF SPS ERP Core Team. Documentation shall be produced at all phases of the implementation. All versions of project documents shall be controlled through a Project Library directory, and the complete documentation set shall be handed over to NSSF SPS upon project completion. All documents shall be submitted in the English language including all user manuals.	M			
R2	Required Project Documentation. The vendor shall produce and deliver, at a minimum, the following documentation: requirements and business process documents including customization, modification, and extension solution documents; architecture and design documents; data migration strategy document reviewed and approved by the NSSF SPS ERP Core Team; testing strategy document reviewed and approved by the NSSF SPS ERP Core Team; training and user guide manuals for each module; technical administration guide covering all technical components of the solution; integration documentation including interface specifications, data mapping documents, and API documentation for all integration points; system configuration guide documenting all system parameters and settings; security administration guide covering user roles, access profiles, and security matrix; and a project closure report confirming completion of all deliverables and outstanding items.	M			
R3	System Recovery and Installation Documentation. The vendor shall provide full backup and restore documentation including front-end backup procedures with scheduler configuration and database restore instructions. The vendor shall additionally provide complete installation guides and all necessary installers enabling NSSF SPS ICT staff to set up the application independently from scratch without vendor assistance.	M			

S. TRAINING AND KNOWLEDGE TRANSFER

No.	Requirement Description	Compliance	YES	NO	Reference Pages
	Training				
S1	The vendor shall provide comprehensive training for: super users, end users, IT personnel, trustees, and secretariat staff.	M			
S2	Training shall cover functional areas (module configuration and setup) and technical areas (system administration, database administration, backup/restore).	M			

No.	Requirement Description	Compliance	YES	NO	Reference Pages
S3	The vendor shall provide a Knowledge Transfer Plan ensuring NSSF SPS staff are involved in all project phases.	M			
S4	Training documentation (user manuals, administrator guides, training materials) shall be provided in English for all modules.	M			
S5	The vendor shall obtain sign-off from respective business process owners after each training stage.	M			

T. TESTING AND ACCEPTANCE

No.	Requirement Description	Compliance	YES	NO	Reference Pages
	Testing and Acceptance				
T1	The vendor shall design, develop, and conduct: Unit Testing, Integration System Testing (IST), User Acceptance Testing (UAT), Performance and Volume Testing, and Regression Testing.	M			
T2	All test scripts, test results, and defect logs shall be submitted to the NSSF SPS ERP Core Team for review and approval.	M			
T3	UAT shall be conducted with NSSF SPS business users for each module before go-live.	M			
T4	A formal Acceptance Certificate shall be issued by NSSF SPS for each phase upon successful completion of UAT.	M			

U. IMPLEMENTATION SCHEDULE AND LOCATION

No.	Requirement Description	Compliance	YES	NO	Reference Pages
U1	Implementation Schedule. The full implementation shall be completed within a maximum of 24 months, structured across two financial years in line with the phased implementation plan described in the Technical and Functional Requirements (Phase 1: FY2026/2027; Phase 2: FY2027/2028). The bidder's implementation schedule shall cover, at a minimum: project organization and management plan; full customization, implementation, and commissioning of the ERP system; regular progress updates to the NSSF SPS ERP Core Team; hardware procurement where necessary; testing schedules including unit testing, integration testing, performance testing, regression testing, and User Acceptance Testing (UAT); training for NSSF SPS executives, managers, end users, and power users; soft launch; final go-live; provision of all documentation and manuals; sign-offs at each milestone; official handover and commissioning of the system; and task, time, and resource scheduling for all activities. The plan shall clearly	M			

No.	Requirement Description	Compliance	YES	NO	Reference Pages
	specify the start and end dates of each project phase relative to the contract signing date, with key milestones enabling visibility of project progress.				
U ₂	Progress Reporting. The bidder shall provide regular structured progress reports to the NSSF SPS ERP Core Team and management throughout the implementation. Each report shall include: results accomplished during the reporting period; deviations from the project plan or milestones, reasons for deviation, and corrective actions with due dates; other issues and outstanding problems with proposed corrective actions; actions required from NSSF SPS with due dates; issues foreseen by the bidder that could impact project progress or effectiveness; project management reports; inspection and quality assurance reports; training participant test results; and a log of service calls and problem resolutions.	M			

V. HARDWARE AND CLOUD INFRASTRUCTURE REQUIREMENTS

No.	Requirement Description	Compliance	YES	NO	Reference Pages
	Infrastructure				
V ₁	Cloud Environment Confirmation. The bidder shall confirm that the proposed solution will operate optimally in a fully cloud-based environment hosted on Microsoft Azure, and shall specify the Azure services, resource types, and deployment model proposed to host and run the solution. The bidder shall confirm the Azure region to be used and demonstrate that the proposed deployment meets data residency requirements under the Kenya Data Protection Act 2019.	M			
V ₂	Technical Architecture and Infrastructure Sizing. The bidder shall provide, at bid stage, an initial infrastructure sizing estimate based on prior implementation experience, covering server configuration and architecture including number of application and database servers, CPU requirements, RAM, and storage capacity; network connectivity requirements including recommended bandwidth, speed, and stability specifications; and recommendations for backup, printing, and development tool requirements. The bidder shall conduct a formal technical architecture and sizing exercise during the Definition Phase to confirm and refine these estimates based on actual NSSF SPS data volumes, user counts, and performance requirements. The outcome of this exercise shall be a signed-off Infrastructure Architecture Document before any provisioning commences.	M			
V ₃	Security and Reliability. The vendor shall ensure that the implementation is secure and reliable for all authorized users accessing the solution via the cloud. Baseline security measures shall include data	M			

No.	Requirement Description	Compliance	YES	NO	Reference Pages
	encryption in transit and at rest; multi-factor authentication for all user access; role-based access controls; intrusion detection and prevention systems; vulnerability management and regular security patching; web application firewall (WAF) configuration; and Data Loss Prevention (DLP) controls to prevent unauthorized exfiltration of member and financial data. In addition to these baseline measures, the vendor shall propose supplementary security controls appropriate for a pension fund operating environment, including but not limited to network segmentation, privileged identity management, security information and event management (SIEM), and endpoint protection. The vendor's security proposal shall demonstrate how the solution meets or exceeds Microsoft Azure's recommended security baseline for financial services workloads.				
V4	Connectivity and Bandwidth. The bidder shall propose an optimal connectivity solution for a fully cloud-based environment, given that NSSF SPS has no existing on-premise ICT infrastructure. The proposal shall include recommended minimum internet bandwidth specifications for the NSSF SPS office to support the expected number of concurrent users without performance degradation; recommendations for redundant internet connectivity using a minimum of two independent Internet Service Providers to eliminate single points of failure; and recommendations for optional bandwidth upgrades to enhance system performance where required.	M			

W. WARRANTY, POST-IMPLEMENTATION AND ANNUAL MAINTENANCE SUPPORT

No.	Requirement Description	Compliance	YES	NO	Reference Pages
	Warranty and Support				
W1	The bidder MUST guarantee free support for 12 months after commissioning of each phase. Phase 1 warranty commences from Phase 1 acceptance; Phase 2 warranty from Phase 2 acceptance.	M			
W2	Service Level Agreement (SLA): P1 Critical — response within 4 hours, resolution within 24 hours; P2 High — response within 8 hours, resolution within 48 hours; P3 Medium — response within 24 hours, resolution within 5 business days.	M			

No.	Requirement Description	Compliance	YES	NO	Reference Pages
W3	The bidder must demonstrate proof of local presence in Kenya with named support contacts. Online support from the software manufacturer is required in addition to local support.	M			
W4	System uptime guarantee of not less than 99.5% measured monthly, excluding agreed maintenance windows.	M			
W5	All intellectual property rights related to customization, configuration, and bespoke development carried out for NSSF SPS under this contract shall be transferred to NSSF SPS upon completion of all payments. Where immediate full transfer of source code is not technically possible upon completion, the vendor shall, as a mandatory condition of contract, deposit all customization source code, configuration files, scripts, and related technical documentation with a recognized third-party software escrow agent within thirty (30) days of contract signing. The escrow arrangement shall be maintained and updated throughout the contract period as new customizations are developed. The escrow deposit shall be released to NSSF SPS upon occurrence of any of the following trigger events: vendor insolvency or liquidation; vendor ceasing to trade or support the product; material breach of contract not remedied within the notice period; or mutual agreement of both parties. The cost of the escrow arrangement shall be borne by the vendor. Evidence of the escrow arrangement, including the escrow agreement and confirmation of deposit, shall be submitted to NSSF SPS within thirty (30) days of contract signing. Failure to establish the escrow arrangement within this period shall constitute a material breach of contract."	M			
W6	Annual maintenance charges must be fixed for a minimum of three years from contract award and stated in Kenya Shillings.	M			
W7	All software updates and patches released during the warranty period must be applied at no additional cost to NSSF SPS.	M			

SECTION IX – SCHEDULE OF REQUIREMENTS

No.	Item Description	Quantity	Unit
1	Supply, Configure, Test and Commission of all Pension Enterprise Resource Planning Solution (all modules as specified) including all manuals (technical and operational). Cloud setup and backup configuration on Microsoft Azure.	1	System
2	Data migration from all current data sources including member records, contribution history, financial data, and HR records.	1	Lump sum
3	Integration with banks, KRA, RBA, and existing legacy systems.	1	Lump sum
4	Train technical and operational staff, trustees, and secretariat as per approved training plan.	1	Lump sum
5	Post go-live support for twelve (12) months per phase, with six (6) months on-site support per phase.	1	Lump sum
6	System documentation and user manuals for all modules.	1	Lump sum

SECTION X – PRICE SCHEDULE OF REQUIREMENTS

Name of Tenderer: _____ Tender Number: NSSFSPS/ICT/ERP/001/2025-2026

No.	Module / Item	Phase	Users/Qty	Unit Cost (KES)	Total Cost (KES)
0	Pension Administration Module	1	5		
1	Financial Management Modules	1	5		
2	HR & Payroll Module	1	5		
3	Procurement Module	2	5		
4	Customer Relationship Module (CRM)	2	5		
5	E-Board Module for Trustee Meetings	2	13		
6	Electronic Document Management System (EDMS)	2	5		
7	Member Self-Service Portals (Mobile App, USSD, Web Portal)	2	Lump sum		
8	Business Intelligence and Reporting Tools	2	2		
9	Liveness Certification / Proof of Life Module	2	Lump sum		
10	Implementation / Professional Services	1 & 2	Lump sum		
11	Data Migration (all historical data)	1	Lump sum		
12	Integration (Banks, RBA, KRA, Legacy Systems)	1	Lump sum		
13	Training (Secretariat, Trustees, Technical Staff)	1 & 2	Lump sum		
14	System Documentation & User Manuals (all modules)	1 & 2	Lump sum		
15	Cloud Infrastructure – Compute (Microsoft Azure)	1 & 2	Per month		
16	Cloud Infrastructure – Storage	1 & 2	Per GB/month		
17	Cloud Infrastructure – Backup & Disaster Recovery	1 & 2	Per month		
18	Annual Maintenance Fee – Year 2 (Post Phase 1)	Post Ph.1	Annual		

No.	Module / Item	Phase	Users/Qty	Unit Cost (KES)	Total Cost (KES)
19	Annual Maintenance Fee – Year 3 (Post Phase 2)	Post Ph.2	Annual		
20	License Renewal – Year 2		Annual		
21	License Renewal – Year 3		Annual		
	Sub-Total (excluding VAT)				
	Value Added Tax (16%)				
	GRAND TOTAL (inclusive of VAT)				

Notes:

- All prices shall be in Kenya Shillings (KES) inclusive of all taxes except VAT which shall be stated separately.
- Unit costs for cloud infrastructure must reflect actual Azure rates; provide breakdown for compute, storage, and backup/DR separately.
- Annual maintenance fees must be fixed for a minimum of three (3) years from contract award.
- Tenderers must price all items; blank items will be assumed to be included in other priced items.

PART 3 – CONTRACT CONDITIONS AND FORMS

SECTION XI – GENERAL CONDITIONS OF CONTRACT (GCC)

1. Contract and Interpretation

6. The Contract shall be interpreted in accordance with the laws of Kenya. In the event of a conflict between the documents forming the Contract, they shall take precedence in the following order: (a) Contract Agreement; (b) Special Conditions of Contract; (c) General Conditions of Contract; (d) Procuring Entity's Requirements; (e) the Supplier's Tender.

2. Contract Documents

7. The following documents shall be deemed to form and be read and construed as part of the Contract: (a) Contract Agreement; (b) Letter of Award; (c) Special Conditions of Contract; (d) General Conditions of Contract; (e) Procuring Entity's Requirements; (f) the Supplier's Tender; (g) Price Schedules; (h) any other document listed in the SCC.

3. Fraud and Corruption

8. The Procuring Entity requires that Suppliers, as well as their subcontractors, agents, personnel, consultants, and service providers, observe the highest standard of ethics in the procurement and execution of the Contract. The Procuring Entity will reject a Tender, annul the award, or terminate the contract if it determines that the Supplier has engaged in fraudulent or corrupt practices.

4. Scope of the System

9. Unless otherwise expressly limited in the SCC, the Supplier's obligations cover the provision of all the items included in the Procuring Entity's Requirements: supply, installation, configuration, customization, testing, commissioning, data migration, integration, training, documentation, and post-implementation support.

5. Time for Commencement and Operational Acceptance

10. The Supplier shall commence implementation within fourteen (14) days from the date of contract signing. The overall implementation schedule shall not exceed 24 months, covering Phase 1 (Financial Year 2026/2027) and Phase 2 (Financial Year 2027/2028), as detailed in the approved Project Implementation Plan.

6. Supplier's Responsibilities

11. The Supplier shall implement the System in accordance with the Contract. The Supplier shall appoint a qualified Project Manager as the primary point of contact. The Supplier shall be responsible for the successful integration and interoperability of all components of the System.

7. Procuring Entity's Responsibilities

12. The Procuring Entity shall provide: (a) timely access to staff and subject matter experts; (b) access to existing data and legacy systems; (c) office space for on-site vendor staff during implementation; (d) an ERP Core Team to participate in all project phases; (e) timely review and sign-off on deliverables.

8. Contract Price and Terms of Payment

13. The Contract Price shall be as specified in the Contract Agreement. Payment shall be made in Kenya Shillings in accordance with the milestone-based payment schedule set out in the SCC. No payment shall be made for work not accepted by the Procuring Entity.

9. Taxes and Duties

14. The Supplier shall pay all applicable taxes, duties, levies, and charges imposed on the Supplier in Kenya in connection with the Contract. VAT shall be handled in accordance with the laws of Kenya and shall be invoiced separately.

10. Copyright and Intellectual Property

15. All intellectual property rights related to customization, configuration, and bespoke development carried out for NSSF SPS under this Contract shall vest in NSSF SPS upon completion of payment. The Supplier shall,

upon contract completion, transfer all source code, documentation, and configuration files relating to customizations to NSSF SPS. For commercial off-the-shelf software components (Microsoft Dynamics 365 Business Central), NSSF SPS shall be granted a perpetual license to use the software.

11. Software License Agreements

16. The Supplier shall provide NSSF SPS with all software licenses required for the operation of the System. Licenses shall be in the name of NSSF SPS. Full details of the licensing model (named users, concurrent users, or other model) shall be provided as part of the technical proposal.

12. Confidential Information

17. Each party shall keep confidential all information received from the other party in connection with this Contract, including but not limited to member data, financial data, system specifications, and security configurations. The Supplier shall not use member data for any purpose other than the performance of this Contract.

13. Project Plan

18. Within fourteen (14) days of contract signing, the Supplier shall submit a detailed Project Implementation Plan (using MS Project or equivalent) for approval by the Procuring Entity. The plan shall include all project phases, milestones, testing schedules, training plans, and go-live dates, and shall be updated monthly.

14. Subcontracting

19. The Supplier shall not subcontract any part of the Contract without prior written approval from the Procuring Entity. The Supplier shall remain fully responsible for the performance of any approved subcontractor.

15. Testing and Commissioning

20. The System shall only be deemed commissioned upon successful completion of User Acceptance Testing (UAT) for each phase, issuance of an Acceptance Certificate by NSSF SPS, and confirmation that all agreed-upon data has been migrated and verified.

16. Defect Liability

21. The Supplier shall be responsible for correcting any defects in the System that become apparent within the Warranty Period (12 months per phase from date of acceptance). The Supplier shall respond to and resolve all defects in accordance with the SLA specified in the SCC.

17. Limitation of Liability

22. The Supplier's aggregate liability under the Contract shall not exceed the total Contract Price. The Supplier shall not be liable for indirect, consequential, or punitive damages, except in cases of gross negligence, willful misconduct, or breach of confidentiality obligations.

18. Force Majeure

23. Neither party shall be considered in breach of Contract if the failure to perform is due to Force Majeure, provided that the affected party notifies the other party in writing within 14 days of the occurrence of such event.

19. Termination

24. The Procuring Entity may terminate the Contract if: (a) the Supplier fails to remedy a material breach within 30 days of written notice; (b) the Supplier becomes insolvent; (c) the Supplier engages in corrupt or fraudulent practices. The Supplier may terminate if the Procuring Entity fails to pay any undisputed amount within 60 days after the due date.

20. Dispute Resolution

25. Any dispute arising out of or in connection with this Contract shall first be attempted to be resolved by mutual discussion. If unresolved within 30 days, the dispute shall be referred to arbitration under the Arbitration Act, 1995 (Kenya). The place of arbitration shall be Nairobi, Kenya.

SECTION XII – SPECIAL CONDITIONS OF CONTRACT (SCC)

GCC Reference	Special Condition
GCC 1	Governing law: Laws of Kenya
GCC 4	Scope: All modules as specified in Part 2. No exclusion of any module is permitted.
GCC 5	Commencement: Within 14 days of contract signing. Implementation period: maximum 24 months (Phase 1: FY 2026/2027; Phase 2: FY 2027/2028).
GCC 8 – Payment	Milestone Payment Schedule: Phase 1: 20% upon contract signing and commencement; 30% upon Phase 1 go-live and Acceptance Certificate; 10% upon Phase 1 post-implementation sign-off (3 months after go-live). Phase 2: 25% upon Phase 2 go-live and Acceptance Certificate; 10% upon Phase 2 post-implementation sign-off; 5% retention released after 12-month warranty for Phase 2.
GCC 10	All customization source code, configuration files, and bespoke development carried out for NSSF SPS shall be transferred to NSSF SPS upon completion of all payments. Where immediate transfer is not possible, a mandatory software escrow arrangement with a recognized third-party escrow agent shall be established within thirty (30) days of contract signing, maintained throughout the contract period, and updated as new customizations are developed. Release triggers shall include vendor insolvency, cessation of business, material breach of contract. Cost of the escrow arrangement shall be borne by the vendor. Failure to establish the escrow within the stipulated period constitutes a material breach. Note: Microsoft Dynamics 365 Business Central core product source code is proprietary to Microsoft Corporation and is governed by the applicable Microsoft licensing agreement; the escrow obligation covers only customizations, configurations, and bespoke development delivered under this contract
GCC 14	Subcontracting: Requires prior written approval from NSSF SPS. Supplier remains fully responsible.
GCC 16 – SLA	Warranty and SLA: P1 Critical (system down): Response 4 hours, Resolution 24 hours. P2 High (major function unavailable): Response 8 hours, Resolution 48 hours. P3 Medium (minor function affected): Response 24 hours, Resolution 5 business days. Uptime: 99.5% measured monthly (excluding agreed maintenance windows).
Performance Security	10% of Contract Price. Valid through end of Phase 2 warranty period plus 60 days. Form: Bank Guarantee or Insurance Bond from a licensed Kenya institution.

SECTION XIII – CONTRACT FORMS

CONTRACT AGREEMENT

This Contract Agreement is entered into on the _____ day of _____, 20____,

BETWEEN:

The National Social Security Fund Staff Pension Scheme (NSSF SPS), a pension scheme established under the Laws of Kenya, with its principal place of business at Hazina Trade Centre, Podium Floor, Moktar Daddah Street, Nairobi, Kenya (hereinafter referred to as the "Procuring Entity"); AND

[NAME OF SUPPLIER], a company incorporated under the laws of Kenya, with its registered offices at [ADDRESS], (hereinafter referred to as the "Supplier").

WHEREAS the Procuring Entity invited tenders for the Supply, Installation, Configuration, Customization, Testing, Commissioning and Maintenance of an Enterprise Resource Planning (ERP) System and has accepted the Tender submitted by the Supplier for the supply of the aforesaid System at the Contract Price of Kenya Shillings _____ (KES _____) inclusive of VAT.

NOW, THEREFORE, THE PARTIES HEREBY AGREE AS FOLLOWS:

26. The following documents shall be deemed to form and be read and construed as part of this Agreement: (a) this Contract Agreement; (b) Letter of Award; (c) Special Conditions of Contract; (d) General Conditions of Contract; (e) Procuring Entity's Requirements; (f) the Supplier's accepted Tender including Price Schedules.
27. In consideration of the payments to be made by the Procuring Entity to the Supplier, the Supplier hereby covenants with the Procuring Entity to supply the System and to remedy defects therein in conformity in all respects with the provisions of the Contract.
28. The Procuring Entity hereby covenants to pay the Supplier in consideration of the supply of the System and remedying of defects therein, the Contract Price or such other sum as may become payable under the provisions of the Contract at the times and in the manner prescribed by the Contract.

IN WITNESS WHEREOF, the parties have caused this Agreement to be signed in their respective names as of the day and year first above written.

For and on behalf of NSSF SPS	For and on behalf of the Supplier

PERFORMANCE SECURITY FORM

To: The Scheme Administrator, National Social Security Fund Staff Pension Scheme

WHEREAS [Name of Supplier] (hereinafter called the "Supplier") has undertaken, in pursuance of Contract No. NSSFSPS/ICT/ERP/001/2025-2026 dated _____, to supply, install, configure, customize, test, commission and maintain an Enterprise Resource Planning (ERP) System for the National Social Security Fund Staff Pension Scheme (hereinafter called the "Contract"),

AND WHEREAS it has been stipulated by you in the said Contract that the Supplier shall furnish you with a Bank Guarantee by a reputable bank for the sum specified therein as security for compliance with the Supplier's performance obligations under the Contract,

AND WHEREAS we have agreed to give the Supplier a Guarantee,

THEREFORE WE hereby affirm that we are Guarantors and responsible to you, on behalf of the Supplier, up to a total of KES _____ (Kenya Shillings _____), and we undertake to pay you, upon your first written demand declaring the Supplier to be in default under the Contract, without cavil or argument, any sum or sums within the limits of KES _____ as aforesaid, without your needing to prove or to show grounds or reasons for your demand or the sum specified therein.

This guarantee is valid until the _____ day of _____, 20____.

Signed: _____

Bank Name: _____

Bank Stamp/Seal:

Date: _____

NOTIFICATION OF INTENTION TO AWARD

Ref: NSSFSPS/ICT/ERP/001/2025-2026

To: [Name and address of Tenderer]

Dear Sir/Madam,

RE: NOTIFICATION OF INTENTION TO AWARD CONTRACT FOR SUPPLY, INSTALLATION, CONFIGURATION, CUSTOMIZATION, TESTING, COMMISSIONING AND MAINTENANCE OF AN ENTERPRISE RESOURCE PLANNING (ERP) SYSTEM

This is to notify you that the National Social Security Fund Staff Pension Scheme (NSSF SPS) intends to award the above contract to:

[Name of Successful Tenderer]

[Address]

Contract Price: KES _____ (inclusive of VAT)

Unsuccessful tenderers may request a debriefing within fourteen (14) days of this notification by writing to the address below. Requests received after this period will not be considered.

Any appeal against this notification must be lodged in accordance with Section 167 of the Public Procurement and Asset Disposal Act, 2015.

Yours faithfully,

The Trust Secretary,
National Social Security Fund Staff Pension Scheme
